

North Yorkshire County Council

Business and Environmental Services

Executive Members

23 August 2019

Highways Capital Programme 2019/20 and 2020/21

Report of the Assistant Director – Highways and Transportation

1.0 Purpose of Report

- 1.1 The purpose of this report is to seek the Corporate Director, Business and Environmental Services (BES) agreement in consultation with the BES Executive Members for the:
- a. Allocation of the carry-over funding for the Highways Capital Programme for Street Lighting, Bridges and Structures, Integrated Transport and Structural Highway Maintenance for 2019/20;
 - b. The contribution from the Countywide Civil Parking Enforcement (CPE) surplus for signs and lines for 2019/20/21
 - c. The 2020/21 Highways Capital Works Programme
- 1.2 It is also to provide the Corporate Director BES in consultation with the BES Executive Members with a brief update on possible additional funding sources.

2.0 Background

- 2.1 The Highways Capital Programme is made up of Street Lighting, Bridges and Structures, Integrated Transport and Structural Highway Maintenance. They are each subject to their own prioritisation methods based upon an assessment of the problem that is being addressed. These criteria have been applied to the development of the 2020/21 programmes of works.
- 2.2 More recently, the 2020/21 carriageway budget allocations have been generated using the principles set out in the report to the Corporate Director and BES Executive Members on the Highway Maintenance Investment tool (HMIT), approved by the Corporate Director in consultation with BES Executive Members in June 2018. In summary this means budget allocation by Highways Areas, treatment type and hierarchies.
- 2.3 The Corporate Director BES in consultation with BES Executive Members considered a report on 15 March 2019 when the headline allocations and distribution of the 2020/21 budget for the various works categories were agreed, along with essential changes to the 2019/20 works programme.
- 2.4 This report sets out the detailed 2020/21 programme of works for Structural Highway Maintenance, Integrated Transport and Street Lighting along with a Bridges and Structures programme for agreement by Corporate Director BES in consultation with BES Executive Members.
- 2.5 Setting the 2020/21 works programme at this stage has significant benefits including the ability to carry out advance design and works programming. It also provides an opportunity to bring forward schemes into the 2019/20 works programme should there be a service need.

- 2.6 At present once all top slice allocations have been assigned, the expected funding available for carriageway treatments is £18.4M. Whilst this is less than the usual £30M received in recent years, we have designed up to £30M of schemes in the expectation that the council may receive additional in year capital funding; it is not unusual for the Department for Transport (DfT) to allocate extra money for pothole repair and general highway maintenance in this way. In the event that additional funding is made available, we will be best placed with a bank of designed schemes ready for delivery.
- 2.7 In the absence of any extra money, the intention is to retain a full patching and surface dressing programme for 2020/21 with the R&R (resurface and reconstruct) schemes introduced should extra budget become available.
- 2.8 This report does not take into account any capital spend that may be required following the recent flooding events in and around Grinton. Whilst emergency financial assistance may be sought, it may be necessary to fund works in the interim from the highways capital works budget.

3.0 DfT Incentive Fund

- 3.1 In January 2019, North Yorkshire County Council submitted its Highway Maintenance Efficiency Programme (HMEP) incentive fund self-assessment questionnaire to the DfT. The assessment placed the Council in the highest category, Band 3, which enabled us to secure the full incentive funding, valued at £4.98M for 2019/20.
- 3.2 Table 1 below shows a breakdown of the 22 question scores and our progression since the 'dry-run' was completed in July 2015. Band 3 is the highest score.

Year	January 2019	January 2018	February 2017	January 2016	July 2015
Band 1	0	0	0	0	2
Band 2	0	1	2	10	19
Band 3	22	21	20	12	1

Table 1

- 3.3 The requirement for Band 3 was a minimum of 18 questions scoring Band 3 so, as can be seen, the County Council exceeded the requirement and has improved on the previous year to achieve all 22 questions at Band 3.

4.0 Local Transport Plan (LTP) Funding Availability

- 4.1 Following confirmation of the financial outturn position for 2018/19, a breakdown of the total funding package available in 2019/20 is set out in Appendix 1 (Sources of Funding Statement 2019/20 and 2020/2021).

5.0 Additional Funding

- 5.1 Alongside the LTP funding, the Corporate Director BES in consultation with BES Executive Members agreed in February 2016 an annual contribution from the Countywide Civil Parking Enforcement (CPE) surplus for signs and lines. An original contribution of £51K has been increased annually by £1K resulting in a figure of £53K in 2018/19, which is consistent with the rules relating use of this funding.

- 5.2. The approved three year investment period for the expenditure of the CPE surplus concluded on the 31 March 2019 and work is in progress to finalise the detail for the next three year investment period. It is intended to include in that report the recommendation to continue with this funding to a similar value as previously approved for the purposes of ensuring regulatory compliance.

Year	Indicative Allocation/£ 000
2019/20	54
2020/21	55

6.0 Additional Local Growth Fund Allocation

- 6.1 BES Executive Members will recall the County Council's bid through the Local Enterprise Partnership (LEP) for £24M additional maintenance funding (over a five year period) for Category 4 road links to eight growth towns in North Yorkshire had been given approval, with £12M already funded by NYCC before 2016. This has been match funded by NYCC Corporate funding of £8M (over the five year period ending in 2020/21).

7.0 NPIF 2

- 7.1 In October 2017, the DfT approved the provision of £3.2M of NPIF 2 (National Productivity Investment Fund) funding for the Enabling Development and Business Growth in Harrogate, to be used in 2018/19 and 2019/20.

7.2 Potential additional funding streams

In addition to the funding sources mentioned above there is potential for further grant funding, as follows:

- **Local Highways Maintenance Challenge Fund:** The aim of this fund is to enable local highway authorities in England to bid for major maintenance projects that are otherwise difficult to fund through the normal Needs Based formula received. The expectation is that Tranche 2b will be announced later this summer.
- **National Roads Fund:** The £28.8 Billion National Roads Fund (NRF) for 2020-2025, which delivers on the Government's commitment to hypothecate English Vehicle Excise Duty (VED) to roads spending was announced in the Budget 2018. Within the NRF, the draft Roads Investment Strategy 2 (RIS2) will receive funding of £25.3Bn. The remaining £3.5Bn will be available for the Major Road Network and Large Local Major schemes.

The DfT has sought suggestions through Transport for the North (TFN) for 10 schemes that are available for short term deliverability on MRN only. NYCC are not in a position to bid for any of the pre 2020/21 funding, due to short turnaround time for delivery of the schemes.

- **Transforming Cities Fund:** This is a £2.5 billion transport fund to support connectivity in some of England's largest cities, which was launched at the Autumn Budget 2017 and expanded in the 2018 Budget with funding running from 2018-19 to 2022-23. Around half has been allocated to Mayoral Combined Authorities on a devolved basis with the remaining amount to be allocated across 12 cities.

West Yorkshire Combined Authority have gone through the expression of interest process and are now working with the DfT to put forward a bid by November 2019. NYCC is working in conjunction with WYCA (West Yorkshire Combined Authority) and the district Councils on packages of schemes in Harrogate, Skipton and Selby, with a combined total value of up to £29M.

- **Future High Streets:** Fund: This is a Government fund of £675M available nationally to district councils (in two tier areas) to help rejuvenate struggling High Streets. The criteria for this fund does allow funding for transport initiatives that may result in helping to rejuvenate the High Street. Six of the seven District Councils submitted bids but none were successful.
- **NPIF 3:** The government will also make £150M of NPIF funding available to local authorities which aims to support projects across England that ease congestion on local routes and for small improvement projects such as for minor junction and road layout improvements. The expectation is that further details will be announced later this summer. It is anticipated that NPIF 3 will be focused on Pinch Point schemes for 2021.

7.3 DfT have indicated that there is likely to be a further opportunity to bid for funding to improve highway 'pinchpoints', in 21/22 and 22/23. No further details on this have been announced as yet, but the overall funding pot is likely to be relatively small at around £75M available nationally and therefore it is probable that schemes will be around the £5M maximum level.

8.0 Approved Headline Allocations for 2020/21

8.1 The headline allocations for 2020/21 already agreed by the Corporate Director BES in consultation with BES Executive Members in March 2019 and any suggested changes are set out in Table 2 below:

	Original 2020/21 Allocation /£000	Changes to 2020/21 Allocation / £000
Integrated Transport	1,198	1,200
Overall Highways Maintenance*	35,832	40,825
Street Lighting	800	800
Bridges and Structures	2,090	2090
TOTAL	39,920	44,915

Table 2

*Includes Internal, External fees and other overheads, and £9,402K for Safer Roads schemes. Net available funding for structural maintenance is £31,423K

8.2 Following confirmation of the 2018/19 year-end outturn position, Appendix 2 (Applications of Funding Statement 2019/20 and 2020/21) contains details of how the total available budget, is now proposed to be allocated.

8.3 Carry Forward Schemes from previous years
Appendix 3 (Schemes Carried Forward from previous years) lists those schemes included in the previous year's programmes that are not yet completed along with their respective estimated costs. It is recommended that these schemes be included in the 2019/20 works programmes. The total cost of carry forward schemes is £6.4 M (this does not include packages such as Safer Roads and NPIF, but does include schemes funded from the additional £13M that we received in December 2018 from the DfT).

9.0 Proposed 2020/21 Works Programme

9.1 Street Lighting

- 9.1.1 The proposed Street Lighting headline allocation for agreement by the Corporate Director in consultation with BES Executive Members is £0.8M.
- 9.1.2 Ongoing testing and inspection continues to identify structural deficiencies in the lighting columns installed prior to 1980, mainly within Harrogate, Knaresborough and Scarborough. Historically, many of the County Council's street lighting columns have also been used to support attachments such as hanging flower baskets, Christmas displays, banners and signs. Unfortunately this activity has shortened the life span of some of these columns which must now be replaced.
- 9.1.3 Work on prioritising these issues is on-going, but a requirement of £150K for Scarborough, £300K for Harrogate and Knaresborough, and £350K for the remainder of the street lighting stock across the County has been identified for 2020/21. It is anticipated that additional allocations will be required in future years and these will be the subject of further reports to the Corporate Director and BES Executive Members in due course.

9.2 Bridges and Structures

The draft list for 20/21 schemes is in Appendix 4.

- 9.2.1 The agreed headline allocation for Bridges and Structures is £2.09M. In addition to scheme costs, this budget also includes a specific allocation for Highway Footbridges.
- 9.2.2 It is proposed that the funding will continue to be targeted at maintaining and strengthening the existing structures stock. The analysis of routine or special inspection reports will identify and prioritise those bridges and structures in need of treatment. In addition, some structural repairs to retaining walls will be required.
- 9.2.3 Dalton Bridge
It was previously agreed with Hambleton District Council that NYCC would fund half of the predicted £474K overspend on this £4.3M scheme, resulting in an NYCC contribution of circa £273K from the LTP allocation.

9.3 Integrated Transport

The agreed headline allocation for Integrated Transport for 2019/20 is £1.2M. The proposed programme of works was approved by Corporate Director BES in consultation with BES Executive Members at the meeting of 15 March 2019.

9.4 Structural Highway Maintenance

The detailed list of schemes is included as Appendix 5 (Structural Highway Maintenance).

- 9.4.1 In line with previous years, there will be an element of top-slicing for specific activities and projects. These include traffic data collection and modelling, highway condition surveys, structures inspections; and pavement investigation and analysis; details of which are given in Table 3 below:

Project	2020/21 Allocation /£
Network Condition Surveys (SCANNER / SCRIM / CVI)	330,000
NYCC Traffic Data Collection Contract	70,000
Pavement Investigation and Analysis	200,000
Highway Drainage Assets	30,000
Highway Drainage Culvert Inspections	10,000
Structures Inspections	190,000
Pre-Planning Application Advice	33,600
Bridges AMX	44,600
Total Top Slice	£908,200

Table 3

- 9.5 Network Condition Surveys (SCANNER / SCRIM / CVI):
Network Condition Surveys include the annual programmes of SCANNER (a machine based condition survey that identifies carriageway surface condition of the heavily used roads), SCRIM (measurement of the skid resistance of the carriageway surface) and CVI (Course Visual Inspection) surveys that identify carriageway surface defects of the lesser used roads. The analysis of the condition surveys is reported back to DfT as part of the Single Data Set of indicators and is used by the Council to generate schemes for inclusion on future years capital maintenance programme. In order to use more recent condition to inform our capital maintenance programme, 100% of the network is to be surveyed in year.
- 9.6 Traffic Data Collection:
We maintain traffic count data on a network of permanent traffic data collection sites, approximately 270 in total. The data is available internally and to partner organisations. We also generate some income from developers and consultants who require the data to produce traffic data for residential and/or industrial developments. We have recently reviewed the way we procure the Traffic Data Collection Service by splitting the service into its three component parts:
- i. Data Collection;
 - ii. Data Storage and Reporting; and,
 - iii. Installation of Counters.
- 9.7 Pavement Investigation and Analysis:
This budget is used to support the treatment options assessment and detailed design processes with the intention of ensuring that selected treatments are effective, efficient and minimise whole life costs and deliver more accurate scheme cost estimates. Additionally in recent years the removal and disposal of tar bound material from highways has become extremely expensive due to its toxicity. As a result, it has become necessary to undertake a testing regime on those roads where maintenance works are scheduled to be carried out which are suspected of having tar bound material. This budget supports this testing as part of the pre-design process.
- 9.7.1 We are constantly looking to better manage tar disposal and its associated costs, including investigation of recycling options. We remain in discussions with our term maintenance contractor, Ringway Infrastructure Services and the expectation is that unit costs over time will be reduced.

- 9.8 Highway Drainage Special Assets:
Special Drainage Asset (Pumps, Ponds, Swales and Interceptors) have predominantly become part of the Council's highway assets through the de-trunking process of the major roads. Specialist inspection and repair works are necessary to ensure continued performance.
- 9.9 Inspection of Highway Related Drainage Culverts:
In conjunction with the 2020 North Yorkshire savings made from a review of the gully cleansing operations, it is even more important that the core network of larger diameter culverts is fit for purpose. We intend to undertake an asset inventory and general regular inspections with subsequent work programmes being generated.
- 9.10 Structures Inspections:
In the same way that we carry out carriageway condition surveys, similar inspections are carried out on the structures assets:
- General Inspections
 - Principal Inspections
 - Underwater Inspections
 - Special Inspections
- 9.11 Pre-Planning Application Advice:
This is an internal charge to the service to cover the cost of specialist officer input into the Capital Works Programme.
- 9.12 Bridges AMX software
This asset management software will require £33K to be initially set up and then support costs of £12K from then on.

10.0 Programme Rationale and Identification

- 10.1 The aim of the Structural Highway Maintenance Capital Programme is to maintain the highway network including its supporting assets as effectively as possible within existing financial constraints.
- Carriageway Programmes
- 10.2 Carriageway Surface Treatments and Schemes (allocation £25.9M)
The Surface Treatment (allocation £10.4M) and Resurface and Reconstruction Schemes (allocation £15.5M) element of the overall capital allocation makes up the remainder of the capital budget when the other highway budgets have been allocated. These budgets have been allocated to each Highways Area and then split for each road hierarchy and treatment type based on the principles of HMIT as approved by the Corporate Director BES in consultation with BES Executive Members in June 2018.
- 10.2.1 The underlying philosophy of this element of the works programme is to maximise the programmes of Surface Treatments (e.g. surface dressing) which are intended to extend the 'useful' life of the pavement and delay the requirement to undertake more major (Resurfacing / Reconstruction) scheme based maintenance activities.
- 10.2.2 The Area Offices are required to identify locations suitable for surface dressing that require minimal preparatory (patching) work. For 2020/21 we are targeting a minimum of 3 Million Square Metres.
- 10.2.3 The Resurfacing / Reconstruction schemes are identified as a consequence of analysing road condition data in order to identify locations where maintenance should be considered now and soon. Secondary analysis of the data groups together these locations of defects into homogenous 'scheme' lengths suggested by Highways Areas to match their HMIT allocations.

- 10.3 Carriageway Patching (Allocation £4.6M):
Works undertaken within this budget heading may also support the advance preparation of sites that have been identified for surface treatments in 2021/22.
- 10.4 Category 6 Roads (Unsurfaced Unclassified Roads) (allocation £200K):
Although our UUR network at 730km in length is only 8% of our network length, it is important for recreational users including walkers, horse riders, motorcyclists and 4x4 drivers. Due to various factors, one of which being the Mechanically Powered Vehicles effect upon the often loose surface of these routes, their deterioration, once begun, can accelerate rapidly. This allocation is now addressing the issue of route damage and will allow the Transport, Waste and Countryside Services team to manage those UURs as part of the transfer of responsibilities which was agreed by Corporate Director BES in consultation with BES Executive Members in March 2018.
- Footway Programmes:
- 10.5 Footway Surface Treatment and Schemes (allocation £1.92M)
It is intended to continue to fund maintenance of the footway network (approximately 4250km) in line with existing allocations. This level of funding in conjunction with our robust cyclic inspection regime is responsible for the gradual reduction in the number of successful Third Party Insurance claims.
- 10.5.1 The DfT has traditionally monitored the condition of the most heavily used element of the Footway network (Category 1a, 1 and 2), in a similar way to carriageways and as a result the scheme based programme is based upon network condition surveys with schemes prioritised across the whole of the countywide network (allocation £400K).
- 10.5.2 The scheme based programme for Category 3, 4 & 5 Footways is based upon locations initially identified by Local Area Offices which are subsequently condition surveyed, and assessed in the same way as the heavily used footway network with the resulting schemes prioritised across the whole of the countywide network. As a consequence of introducing a local version of the Footway Network Survey (FNS), whereby the footway condition is identified by Highways Officers during their routine Highway Safety Inspections, Area Offices can now make more objective submissions of locations for assessment and prioritisation. (allocation £1M)
- 10.5.3 The Surface Treatment budget acknowledges that many of the lesser used footways (Categories 3, 4 & 5) benefit in the same way as carriageways with the application of preventative maintenance treatments. The budget allocation is based upon the (estimated) percentage of footway network in each Area; each Area Office is responsible for the identification of their programme which is based upon local knowledge and the cyclical Highway Safety Inspections (allocation £520K).
- 10.6 Footway Patching (allocation £225K):
The patching budget is allocated on the percentage of that category of footway network within the Highways Area Office boundary. (Category 1a, 1 & 2 = £100,000; Category 3, 4 & 5 = £125,000)
- 10.7 Cycleways/Cycle Tracks: (allocation £60K)
As a consequence of the abolition of the County Council's Agency Agreements with both Harrogate and Scarborough Borough Council we have inherited a substantial network of cycleways/ cycle tracks that form part of the highway network.
- 10.8 Highway Drainage: (allocation £600k)
The works programme is identified and prioritised by each Area Office based upon local knowledge, Highway Safety Inspections and local priorities.

- 10.9 Landslip Schemes: (allocation £600K)
Landslips can occur at any time of the year although many are identified at an early stage as a consequence of routine Highway Safety Inspections. Area Offices submit locations which are subsequently prioritised countywide.
- 10.10 Other Special Engineering Schemes: (allocation £600k)
The annual programme of Other Special Engineering Schemes is based upon locations identified by Area Offices which do not fall 'objectively' into other works categories, e.g. areas of cobbles or setts, laybys and guardrails etc. Area Offices identify the rationale behind their submissions and the countywide programme is determined based upon an assessment of need and network priority.
- 10.11 Vehicle Restraint Systems (VRS): (allocation £600K)
As a consequence of progressing our cyclical service inspection regime on our VRS assets we have identified a significant programme of required upgrading and repairs. In addition to this, inspections on assets over 15 years old are required every 2 years to assess condition and assist in prioritising repair works. This is reflected in the increased funding from £300K to £600K.
- 10.12 Cattle Grids: (allocation £200K)
Each Area Office has identified and prioritised an on-going annual programme of cattle grid maintenance schemes. The increased budget reflects the underlying risk created by the condition of this asset group.

11.0 Revised Headline Allocations 2019/20 and 2020/21

- 11.1 The revised headline allocations are set out in Appendices 1 & 2.

12.0 Financial Implications

- 12.1 The contents of this report do not affect the BES Capital Plan that was approved by the Executive on 29 January 2019 and subsequently by County Council on 19 February 2019.

13.0 Equalities Implications

- 13.1 Consideration has been given to the potential for any adverse equality impacts arising from the recommendation. The allocation of funding is based on the "manage, maintain and improve" (MMI) hierarchy set out in Local Transport Plan 4; which has been the subject of an Equality Impact Assessment (EIA). This concluded that the introduction of fewer improvement schemes may have a greater impact on people with mobility difficulties or without access to a private vehicle as there will be fewer new facilities provided e.g. pedestrian crossings, dropped kerbs, bus stop accessibility improvements; however, it is also considered that prioritising maintenance, particularly for footways, through the MMI hierarchy is likely to produce a net benefit for people with the same protected characteristics; particularly in terms of age and disability. Furthermore, the local accessibility budget has been agreed and introduced. This has achieved a positive equality impact as it provides flexibility for funding for improvement schemes such as dropped kerbs which reduces any impact the MMI has on people with mobility difficulties or those without access to private vehicles. This also ensures the recommendation does not have an adverse impact on any of the protected characteristics identified in the Equalities Act 2010. Taking into account the local accessibility budget and the positive outcome of the EIA in the Local Transport Plan 4 with regards to the MMI hierarchy it is considered that there are no adverse impacts arising from the allocation of funding based on the MMI and subsequent recommendation. Therefore an Equalities Impact Assessment is not required. The Authority will continue to consider and pay due regard to the Public Sector Equality Duty throughout the allocation of funding for the Capital Programme.

13.2 A copy of the 'Record of Decision that Equality Impact Assessment is not required' is attached as Appendix 6.

14.0 Legal Implications

14.1 The County Council as Local Highway Authority has a wide range of statutory duties imposed by a variety of legislation relating to highways and transportation and also has a wide range of duties imposed by legislation in its capacity as Lead Local Flood Authority, Street Authority and Local Traffic Authority, including a duty under s41 of the Highways Act 1980 to maintain highways maintainable at the public expense and a duty under s122 of the Road Traffic Regulation Act 1984 to secure the expeditious, convenient and safe movement of vehicular and other traffic (including pedestrians) and the provision of suitable and adequate parking facilities on and off the highway. Under s16 of the Traffic Management Act 2004, the County Council is also required to manage its road network to secure the expeditious movement of traffic in that network.

14.2 The proposed capital programme allocations and schemes have been developed and prioritised in line with the County Councils duties and responsibilities under the above and other legislation, including the Transport Act 2000 and the Flood and Water Management Act 2010.

15.0 Recommendations

15.1 It is recommended that Corporate Director BES in consultation with BES Executive Members:

- a. Agree the delivery of the carry-forward schemes from previous years Highways Capital budget to the proposed programme of schemes as set out in section 9.1 and Appendix 3 of this report;
- b. Agree the contribution from CPE surplus to the Capital Works Programme for signs and lines for 2019/20 and 2020/21 as set out in section 5.2
- c. Agree the Highways Capital Programme for 2020/21 for Structural Highway Maintenance, Street Lighting and Structures as set out in section 10 and Appendices 4 and 5

Initial equality impact assessment screening form (As of October 2015 this form replaces 'Record of decision not to carry out an EIA')			
This form records an equality screening process to determine the relevance of equality to a proposal, and a decision whether or not a full EIA would be appropriate or proportionate.			
Directorate	Business and Environmental Services		
Service area	Highways and Transportation		
Proposal being screened	Agree the 2020/21 Capital Programme of Highway Works		
Officer(s) carrying out screening	Neil Leighton		
What are you proposing to do?	Deliver a programme of highways capital works.		
Why are you proposing this? What are the desired outcomes?	To maintain, and where appropriate, improve the highway asset infrastructure and to comply with the County Councils duties and responsibilities under the relevant legislation (as detailed in the Report).		
Does the proposal involve a significant commitment or removal of resources? Please give details.	The commitment is to allocate a budget in excess of £40M to capital works and to monitor and manage the budget and works programme accordingly.		
Is there likely to be an adverse impact on people with any of the following protected characteristics as defined by the Equality Act 2010, or NYCC's additional agreed characteristics?			
As part of this assessment, please consider the following questions:			
<ul style="list-style-type: none"> To what extent is this service used by particular groups of people with protected characteristics? Does the proposal relate to functions that previous consultation has identified as important? Do different groups have different needs or experiences in the area the proposal relates to? 			
If for any characteristic it is considered that there is likely to be a significant adverse impact or you have ticked 'Don't know/no info available', then a full EIA should be carried out where this is proportionate. You are advised to speak to your Equality rep for advice if you are in any doubt.			
Protected characteristic	Yes	No	Don't know/No info available
Age		✓	
Disability		✓	
Sex (Gender)		✓	
Race		✓	
Sexual orientation		✓	
Gender reassignment		✓	
Religion or belief		✓	
Pregnancy or maternity		✓	
Marriage or civil partnership		✓	
NYCC additional characteristic			
People in rural areas		✓	
People on a low income		✓	
Carer (unpaid family or friend)		✓	

<p>Does the proposal relate to an area where there are known inequalities/probable impacts (e.g. disabled people's access to public transport)? Please give details.</p>	<p>Yes. Physical accessibility of the highway network for people with mobility difficulties.</p>			
<p>Will the proposal have a significant effect on how other organisations operate? (e.g. partners, funding criteria, etc.). Do any of these organisations support people with protected characteristics? Please explain why you have reached this conclusion.</p>	<p>No. Highway Capital Maintenance is a specific annual programme of works which doesn't rely on the activities of other organisations.</p>			
<p>Decision (Please tick one option)</p>	<p>EIA not relevant or proportionate:</p>	<p><input checked="" type="checkbox"/></p>	<p>Continue to full EIA:</p>	
<p>Reason for decision</p>	<p>The allocation of funding is based on the "Manage, Maintain and Improve" (MMI) hierarchy set out in Local Transport Plan 4, which has been the subject of an Equality Impact Assessment (EIA). This concluded that the introduction of fewer improvement schemes may have a greater impact on people with mobility difficulties or without access to a private vehicle as there will be fewer new facilities provided e.g. pedestrian crossings, dropped kerbs, bus stop accessibility improvements; however, it is also considered that prioritising maintenance, particularly for footways, through the MMI hierarchy is likely to produce a net benefit for people with the same protected characteristics; particularly in terms of age and disability.</p>			
<p>Signed (Assistant Director or equivalent)</p>	<p>Barrie Mason</p>			
<p>Date</p>	<p>04/07/18</p>
