Highways Capital Programme 2021/2022

Report of the Assistant Director – Highways and Transportation

1.0 Purpose of Report

- 1.1 The purpose of this report is to seek the Corporate Director, Business and Environmental Services' (BES) agreement in consultation with the BES Executive Members for the:
- a. Allocation of the carry-over funding for the Highways Capital Programme for Street Lighting, Bridges and Structures, Integrated Transport and Structural Highway Maintenance for 2020/21;
 - b. Schemes for inclusion in the 2021/22 Highways Capital Programme

2.0 Background

- 2.1 The Highways Capital Programme is made up of Street Lighting, Bridges and Structures, Integrated Transport and Structural Highway Maintenance. They are each subject to their own prioritisation methods based upon an assessment of the problem that is being addressed. The method adopted to prioritise schemes within different works categories was reported to members in January 2013. These criteria have been applied to the development of the 2021/22 programmes of works. In addition to this, the provisional 2021/22 carriageway budget allocations have been generated using the principles set out in the BES Executive Members report on the Highways Management Investment tool (HMIT), approved by the Corporate Director in consultation with BES Executive Members 28 June 2018.
- 2.2 The Corporate Director BES in consultation with BES Executive Members considered a report on 26 June 2020 where the provisional the headline allocations and distribution of the 2021/22 budget for the various works categories were agreed. These headline allocations remain provisional as the Department for Transport is yet to confirm the capital funding award for 2021/22. It is anticipated that this will be announced in the autumn following the comprehensive spending review.
- 2.3 This report sets out the detailed 2021/22 programme of works for Structural Highway Maintenance, Integrated Transport and Street Lighting along with a Bridges and Structures programme for agreement by Corporate Director BES in consultation with BES Executive Members.
- 2.4 Setting the 2021/22 works programme at this stage has significant benefits including the ability to carry out advance design and works programming. It also provides an opportunity to bring forward schemes into the 2020/21 works programme should there be a service need.

- 2.5 Allocation of Carriageway treatment budgets using the HMIT model have been calculated based on actual budgets received in recent years and on network condition data. Based on current funding assumptions this equates to £44M for Carriageway Treatments. The intention is to design all these schemes to provide a rolling programme, a bank of designed schemes ready for delivery if additional monies are received in year.
- 2.6 At present once all top slice allocations have been assigned the expected funding available for carriageway and footway treatments is £35.1M, therefore schemes for delivery in 2021/22 will be assigned to match the available budget when this is confirmed by DfT. Those schemes that are not possible to be delivered in 2021/22 due to budget restrictions will be designed and ready for delivery when funds are available, either in the following year or in year if additional funds become available.
- 2.7 In total £36.9M of new carriageway & footway schemes are included within the programme. This level of over programming provides flexibility within the programme and also ensures that should additional funding be awarded, schemes are pre designed and ready to deliver or they can be re programmed in to subsequent years.
- 2.8 Scheme cost estimates are based on the existing contract rates with Ringway Infrastructure services as the schedule of rates for NY Highways has yet to be confirmed.

3.0 Programme Management

- 3.1 The operation of a rolling forward programme allows flexibility to move schemes back or forward for delivery, helping us to manage any variations in costs or available budgets. Part of this process involves the movement of schemes between financial years as outlined in section 3.3 & 3.4 below.
- 3.2 There are instances where schemes or funding is required in year. Where this is required a report is presented to the meeting of the Corporate Director BES and BES Executive Members, typically the budget impact of this can be managed due to delays in other scheme delivery.
- 3.3 The A19 Chapel Haddlesley scheme, to repair damage caused by flood events in February 2020 is forecast to cost £6.6M to complete. A £6M funding bid has been submitted to the York and North Yorkshire Local Enterprise Partnership (LEP) to fund this scheme, which would require a local contribution from our LTP budget of £600K. A decision on the LEP funding is due in early September. Officers are working on the assumption that we will be successful with the LEP funding bid, and as such £600K from the 2020/21 LTP budget has been allocated for this contribution. Should the bid be successful, formal approval will be sought for acceptance of the LEP funding and allocation of the local contribution at a subsequent meeting of the Corporate Director and Executive Members. Should LEP funding not be awarded, £6M schemes would have to be moved from 2020/21 in to 2021/22 to accommodate the A19 Chapel Haddlesley scheme.
- 3.4 Carry Forward Schemes from previous years
Appendix 1 (Schemes Carried Forward from previous years) lists those schemes included in the previous year's programmes that are not yet completed along with their respective estimated costs. It is recommended that these schemes are included in the 2020/21 work programmes.

- 3.5 As a result of the movement of schemes from 2019/20 in to 2020/21, alongside the requirement for a £600K local contribution towards the A19 Chapel Haddlesley scheme, a level of over programming (where the value of schemes to be delivered is greater than the variable budget) has been identified within the 2020/21 programme. To help manage this over programming several schemes have been moved for delivery from 2020/21 in to 2021/22. These schemes are outlined in Appendix 2
- 3.6 As delivery of the 2020/21 programme continues, further schemes may be moved in to 2021/22 as a result of operational issues.

4.0 Approved indicative headline allocations for 2021/22

- 4.1 The headline allocations for 2021/22 already agreed by the Corporate Director BES in consultation with BES Executive Members in June 2020 and are summarised in the table below

	Indicative 2021/22 Allocation /£000
Integrated Transport	1145
Overall Highways Maintenance*	44,530
Street Lighting	800
Bridges and Structures	2090
TOTAL	40,541

*Includes Internal, External fees and other overheads, schemes carried over from 19/20 and borrowing for 19/20 over programming.

5.0 Proposed 2021/22 Works Programme

- 5.1 Street Lighting
The proposed Street Lighting headline allocation for agreement by the Corporate Director in consultation with BES Executive Members is £0.8M.
- 5.2 There have been a number of street lighting specifications in North Yorkshire each with varying degrees of long term success. Prior to the late 1970's, most columns were of mild steel construction with minimal lead oxide and paint treatment. In the mid to late 1970's North Yorkshire County Council specified that the steel columns should be galvanised and painted. From 2005 onwards, new lighting columns had an additional plascoat treatment applied which now offers a 30 year guarantee and an anticipated life of at least 70 years.
- 5.3 Ongoing testing and inspection continues to identify structural deficiencies in the lighting columns installed prior to 1980, mainly within Harrogate, Knaresborough and Scarborough. Historically, many of the County Council's street lighting columns have also been used to support attachments such as hanging flower baskets, Christmas displays, banners and signs. Unfortunately this activity has shortened the life span of some of these columns which must now be replaced. Additionally the cable networks providing power supply to these sites is increasingly presenting issues, which will require capital funding to resolve.
- 5.4 Work on prioritising these issues is on-going, but a requirement of £150K for Scarborough, £300K for Harrogate and Knaresborough, and £350K for the remainder of the street lighting stock across the County has already been identified for 2020/21. It is anticipated that additional allocations will be required in future years and these will be the subject of further reports to the Corporate Director and BES Executive Members in due course.

- 5.5 Full structural inspection will be undertaken on all street lighting columns that currently support attachments. Based on visual inspections it is anticipated that full structural testing will identify a number of failures and these locations, together with columns identified “in year”, during 2021/22, will form the basis for the £350k allocation identified above
- 5.6 **Bridges and Structures**
The agreed headline allocation for Bridges and Structures is £2.09M. In addition to scheme costs, this budget also includes a specific allocation for highway footbridges. Details of the proposed schemes are in appendix 3
- 5.7 It is proposed that the funding will continue to be targeted at maintaining and strengthening the existing structures stock. Routine bridges inspections are continuing until autumn this year, the results of which may impact on the proposed programme. Should any changes be required to this proposed programme, a further report will be presented to the Corporate Director BES and BES Executive Members at a future meeting.
- 5.8 **Integrated Transport**
The agreed headline allocation for Integrated Transport for 2019/20 is £1.145M.
- 5.9 **Structural Highway Maintenance**
The aim of the Structural Highway Maintenance Capital Programme is to maintain the highway network including its supporting assets as effectively as possible within existing financial constraints. As outlined in the 26th June 2020 report to Corporate Director BES of “top-slicing” for specific activities and projects. These include traffic data collection and modelling, highway condition surveys, structures inspections; and pavement investigation and analysis, this is illustrated in the table below

Project	2020/21 Allocation/ £000s
Network Condition Surveys (SCANNER / SCRIM / CVI)	330,000
NYCC Traffic Data Collection Contract	70,000
Pavement Investigation and Analysis	500,000
Highway Drainage Assets	30,000
Highway Drainage Culvert Inspections	10,000
Structures Inspections	190,000
Pre-Planning Application Advice	33,600
Bridges AMX	12,200
Total Top Slice	1,175,800

5.10 Carriageway Surface Treatments and Schemes

As outlined in the 26th June 2020 report to Corporate Director BES indicative funding for carriageway maintenance will be allocated as per the following;

A. Carriageway Treatment	B. Proposed 2021/22 Allocation /£000	C. Proposed 2021/22* programme value /£000
Surface Treatments	9900	7627
Resurface and Reconstruction (R&R)	11300	16124*
Carriageway patching	9700	8536

*includes an allocation of £200k for Cat 6 network

Further work is taking place to increase the Surface Treatments -from £7,627K to match the proposed allocation of £9,900K

- 5.11 Column C includes a level of over programming. The delivery programme will be finalised once the budgets for 2021/22 have been confirmed by DfT.
- 5.12 The surface treatment and resurface and reconstruction schemes budgets has been allocated to each Highways Area and then split for each road hierarchy and treatment type based on the principles of HMIT as approved by the Corporate Director BES in consultation with BES Executive Members in June 2018
- 5.13 The underlying philosophy of this element of the works programme is to maximise the programmes of Surface Treatments (e.g. surface dressing) which are intended to extend the 'useful' life of the pavement and delay the requirement to undertake more major (Resurfacing / Reconstruction) scheme based maintenance activities.
- 5.14 Area Offices are required to identify locations suitable for surface dressing that require minimal preparatory (patching) work.
- 5.15 A validation exercise to understand the suitability of surface dressing on identified defects has been carried out this summer. Following this, further work is ongoing to identify additional surface dressing schemes. Details of identified schemes will be presented to a future meeting of the BES Corporate Director and Executive Members.
- 5.16 It should be noted that any increase in surface dressing expenditure will reduce the amount of funding available for R&R schemes
- 5.17 Carriageway patching works undertaken within this budget heading may also support the advance preparation of sites that have been identified for surface treatments in 2021/22.
- 5.18 Appendix 4 outlines the proposed schemes for each treatment type

5.19 Footway Maintenance:

As outlined in the 26th June report to Corporate Director BES indicative funding for footway maintenance will be allocated as per column B in the following table;

A. Footway Treatment	B. Proposed 2021/22 Allocation /£000	C. Proposed 2021/22 programme value /£000
Category 1a, 1 & 2 footways	400	488
Category 3,4 & 5 footways	1000	1121
Category 3,4 & 5 footway surface treatments	520	508
Category 1a, 1 & 2 footway patching	100	100
Category 3,4 & 5 footway patching treatments	125	125
Cycleways / Cycle Tracks	60	60

5.20 Column C includes a level of over programming. The delivery programme will be finalised once the budgets for 2021/22 have been confirmed by DfT.

5.21 Appendix 5 outlines the proposed schemes for each treatment type

5.22 Other Schemes

As outlined in the 26th June report to Corporate Director BES indicative funding for other schemes will be allocated as per column B in the following table;

A. Other scheme type	B. Proposed 2021/22 allocation /£000	C. Proposed 2021/22* programme value /£000
Highway drainage	600	582
Landslip schemes	600	500
Other special engineering schemes	600	631
Vehicle restraint systems	600	600
Cattle Grids	200	147

5.23 Details of these schemes are outlined in Appendix 6

6.0 Additional Funding Sources

6.1 Alongside the structural highway maintenance programme, there are other capital funding sources that are being used to deliver schemes within North Yorkshire, these are outlined below.

6.2 Safer Roads Fund

Delivery and design work is ongoing of schemes on the A684. Funding for the A6108 schemes has yet to be received from DfT, although we expect this to be imminent. As a result, it is likely that schemes planned on the A6108 may need to be delivered in 2021/22.

6.3 Delivery of the west of Harrogate package has been delayed due to ongoing utilities issues. A revised programme is being developed, which may result in some elements of this package being moved in to 2021/22 for delivery.

- 6.4 **Transforming Cities Fund (TCF)**
As approved by the County Council Executive on 19th May 2020, the County Council alongside Selby District Council, Harrogate Borough Council and Craven District Council accepted an award of £31.1M as part of the TCF. Including local contributions, the total value of the TCF is £33.3M
- 6.5 The County Council is responsible for the delivery of £18.9M of the overall fund, with the remainder being delivered by district and borough councils.
- 6.6 A delivery programme is in the process of being developed with scheme delivery scheduled to commence in late 2020/21. Schemes are required to be delivered by March 2023.
- 6.7 In addition to the funding sources mentioned above there is potential for further grant funding
- 6.8 **Local Highways Maintenance Challenge Fund (HMCF)**
The 2020/21 HMCF was awarded proportionally across local highway authorities. At the time of compiling this report it is unclear whether an opportunity for additional funding will be opened by DfT for 2021/22. Should funding become available, officers will produce a bid and seek approval from the Corporate Director in consultation with Executive Members
- 6.9 **Transport for the North (TfN) Economic Recovery Plan (ERP)**
As part of the Covid 19 response, TfN has asked stakeholders to put forward suggestions for capital schemes that will help to stimulate the economy of the North. This ERP would then be presented to central government as a pan northern proposal. The NYCC proposals are outlined below;
- A59 Kex Gill
 - A65 Coniston Cold Bridge
 - A19 Chapel Haddlesley
 - Cat 2/3a Highway Maintenance
 - Harrogate Cycling and Walking improvements
 - Scarborough Cycling and Walking improvement package
 - Selby Cycling and Walking improvement package

7.0 Financial Implications

- 7.1 The contents of this report do not affect the expenditure limits contained in the BES Capital Plan.
- 7.2 As outlined in this report, continued management of the 2020/21 programme will continue to maximise scheme delivery and ensure appropriate budget management.

8.0 Equalities Implications

- 8.1 Consideration has been given to the potential for any adverse equality impacts arising from the recommendation. The allocation of funding is based on the “manage, maintain and improve” (MMI) hierarchy set out in Local Transport Plan 4; which has been the subject of an Equality Impact Assessment (EIA). This concluded that the introduction of fewer improvement schemes may have a greater impact on people with mobility difficulties or without access to a private vehicle as there will be fewer new facilities provided e.g. pedestrian crossings, dropped kerbs, bus stop accessibility improvements; however, it is also considered that prioritising maintenance, particularly for footways, through the MMI hierarchy is likely to produce a net benefit for people with the same protected characteristics; particularly in terms of age and disability.
- 8.2 Furthermore, the local accessibility budget has been agreed and introduced. This has achieved a positive equality impact as it provides flexibility for funding for improvement schemes such as dropped kerbs which reduces any impact the MMI has on people with mobility difficulties or those without access to private vehicles. This also ensures the recommendation does not have an adverse impact on any of the protected characteristics identified in the Equalities Act 2010. Taking into account the local accessibility budget and the positive outcome of the EIA in the Local Transport Plan 4 with regards to the MMI hierarchy it is considered that there are no adverse impacts arising from the allocation of funding based on the MMI and subsequent recommendation. Therefore, an Equalities Impact Assessment is not required. The Authority will continue to consider and pay due regard to the Public Sector Equality Duty throughout the allocation of funding for the Capital Programme.
- 8.3 A copy of the ‘Record of Decision that Equality Impact Assessment is not required’ is attached as Appendix 7.

9.0 Legal Implications

- 9.1 The County Council as Local Highway Authority has a wide range of statutory duties imposed by a variety of legislation relating to highways and transportation and also has a wide range of duties imposed by legislation in its capacity as Lead Local Flood Authority, Street Authority and Local Traffic Authority, including a duty under s41 of the Highways Act 1980 to maintain highways maintainable at the public expense and a duty under s122 of the Road Traffic Regulation Act 1984 to secure the expeditious, convenient and safe movement of vehicular and other traffic (including pedestrians) and the provision of suitable and adequate parking facilities on and off the highway. Under s16 of the Traffic Management Act 2004, the County Council is also required to manage its road network to secure the expeditious movement of traffic in that network.
- 9.2 The proposed capital programme allocations and schemes have been developed and prioritised in line with the County Councils duties and responsibilities under the above and other legislation, including the Transport Act 2000 and the Flood and Water Management Act 2010.

10.0 Recommendation(s)

- 10.1 It is recommended that Corporate Director BES in consultation with BES Executive Members:
- a. Agree the delivery of the carry-forward schemes from previous years Highways Capital budget to the 2020/21 programme of schemes as set out in section 3 of this report and Appendix 1 of this report;
 - b. Agree the schemes for inclusion in the Highways Capital Programme for 2021/22 for Structural Highway Maintenance, Street Lighting and Structures as set out in section 5 and Appendices 2,3,4,5,6 and 7

BARRIE MASON
Assistant Director
Highways and Transportation

Cattle Grids Total						£147,000		

Initial equality impact assessment screening form (As of October 2015 this form replaces 'Record of decision not to carry out an EIA')			
This form records an equality screening process to determine the relevance of equality to a proposal, and a decision whether or not a full EIA would be appropriate or proportionate.			
Directorate	Business and Environmental Services		
Service area	Highways and Transportation		
Proposal being screened	Agree the 2021/22 Capital Programme of Highway Works		
Officer(s) carrying out screening	James Gilroy		
What are you proposing to do?	Deliver a programme of highways capital works.		
Why are you proposing this? What are the desired outcomes?	To maintain, and where appropriate, improve the highway asset infrastructure and to comply with the County Councils duties and responsibilities under the relevant legislation (as detailed in the Report).		
Does the proposal involve a significant commitment or removal of resources? Please give details.	The commitment is to allocate a budget in excess of £40M to capital works and to monitor and manage the budget and works programme accordingly.		
Is there likely to be an adverse impact on people with any of the following protected characteristics as defined by the Equality Act 2010, or NYCC's additional agreed characteristics?			
As part of this assessment, please consider the following questions:			
<ul style="list-style-type: none"> To what extent is this service used by particular groups of people with protected characteristics? Does the proposal relate to functions that previous consultation has identified as important? Do different groups have different needs or experiences in the area the proposal relates to? 			
If for any characteristic it is considered that there is likely to be a significant adverse impact or you have ticked 'Don't know/no info available', then a full EIA should be carried out where this is proportionate. You are advised to speak to your Equality rep for advice if you are in any doubt.			
Protected characteristic	Yes	No	Don't know/No info available
Age		✓	
Disability		✓	
Sex (Gender)		✓	
Race		✓	
Sexual orientation		✓	
Gender reassignment		✓	
Religion or belief		✓	
Pregnancy or maternity		✓	
Marriage or civil partnership		✓	
NYCC additional characteristic			
People in rural areas		✓	
People on a low income		✓	
Carer (unpaid family or friend)		✓	

<p>Does the proposal relate to an area where there are known inequalities/probable impacts (e.g. disabled people's access to public transport)? Please give details.</p>	<p>Yes. Physical accessibility of the highway network for people with mobility difficulties.</p>			
<p>Will the proposal have a significant effect on how other organisations operate? (E.g. partners, funding criteria, etc.). Do any of these organisations support people with protected characteristics? Please explain why you have reached this conclusion.</p>	<p>No. Highway Capital Maintenance is a specific annual programme of works which doesn't rely on the activities of other organisations.</p>			
<p>Decision (Please tick one option)</p>	<p>EIA not relevant or proportionate:</p>	<p><input checked="" type="checkbox"/></p>	<p>Continue to full EIA:</p>	
<p>Reason for decision</p>	<p>The allocation of funding is based on the "Manage, Maintain and Improve" (MMI) hierarchy set out in Local Transport Plan 4, which has been the subject of an Equality Impact Assessment (EIA). This concluded that the introduction of fewer improvement schemes may have a greater impact on people with mobility difficulties or without access to a private vehicle as there will be fewer new facilities provided e.g. pedestrian crossings, dropped kerbs, bus stop accessibility improvements; however, it is also considered that prioritising maintenance, particularly for footways, through the MMI hierarchy is likely to produce a net benefit for people with the same protected characteristics; particularly in terms of age and disability.</p>			
<p>Signed (Assistant Director or equivalent)</p>	<p>Barrie Mason</p>			
<p>Date</p>	<p>10/08/20</p>
