Executive Members

15 March 2019

Highways Capital Programme 2019/20 – 2020/21

Report of the Assistant Director – Highways and Transportation

1.0 Purpose of Report

- 1.1 To seek Corporate Director, Business and Environmental Services (BES) in consultation with BES Executive Members, approval:
- i. For changes to the Highways Capital Programme for Street Lighting, Bridges and Structures, Integrated Transport and Structural Highway Maintenance for 2019/20
 - ii. For the 2020/2021 financial year headline allocations as part of the rolling capital programme
 - iii. For approval of schemes to be funded from the re-profiled LTP funding

2.0 Background

- 2.1 The delivery of the capital works programme is the tangible outcome of the whole of life cycle asset management approach outlined within the North Yorkshire County Council Highways Asset Management Framework.
- 2.2 Specifically the programming and delivery of capital works align with the Highways Infrastructure Asset Management Strategy. As such the objectives of the capital works programme are as follows:
- Improve the condition of the highway asset
 - Maximise and demonstrate Value for Money (VfM)
 - Manage VfM and drive efficiencies over the whole programme term, not just the financial year at hand.
 - Deliver on time and to budget, safely and without incident
- 2.3 The North Yorkshire County Council Highways Capital Programme is made up of four specific elements:
- Street Lighting
 - Bridges and Structures
 - Integrated Transport
 - Structural Highway Maintenance
- 2.4 A report was considered by the Corporate Director, BES in consultation with the BES Executive Members in July 2018 when the 2019/20 Highways Capital Works programme was agreed. This report sets out the revisions to that programme. The Corporate Director BES and BES Executive Members will recall agreeing the recommendations of the report which was presented to their meeting of 29 June 2018 regarding the further development and use of the Highway Maintenance Investment Tool (HMIT) to divide the capital allocations across road hierarchies. This tool was a direct outcome of the project to review and further develop the methodology for the capital programme. It is currently planned to present a more detailed report on the use of the HMIT tool and the proposed method of programme development.at a future meeting of BES Executive Members.

3.0 2019/2020 Funding

3.1 Information regarding funding sources can be found at Appendix A.

Annual Programme Grants

3.2 Block Allocations

The Department for Transport (DfT) confirmed the Local Transport Plan (LTP) block allocation for the 'needs based' Highway Maintenance element in November 2018. This amount is £23,858K

3.2.1 LTP Grant Integrated Transport

£3,023K was confirmed as the Integrated Transport Grant from the DfT. It is proposed that £1199K will continue to be budgeted for Integrated Transport schemes, the remaining funds will go towards Highways structural maintenance in line with our established Manage, Maintain and Improve approach contained in Local Transport Plan 4.

3.2.2 Incentive element

Members will recall that local highways authorities are required to self-assess annually, with the assessment attracting a given level of incentive fund according to a banding system. North Yorkshire County Council continue to attract the largest amount of incentive funding by remaining at the highest Band (Band 3), so maximising the funding allocation available. The latest self-assessment saw all 22 questions being rated at the highest level of Band 3.

3.2.3 The Table below contains details of the incentive fund allocations for 2018/19 to 2020/21. The benefit of achieving and retaining Band 3 status is an additional £16.053 over three years.

Year	Allocation (£M)	Extra Sum available through 'Incentive' element (£M)		
		Band 3	Band 2	Band 1
2018/19	23.858	5.008*	3.478	1.491
2019/20	23.858	5.336*	2.485	0.497
2020/21	23.858	5.709*	1.491	0
Total	71.574	16.053*	7.454	1.988

* In previous years the amount has increased due to inflation each year. An estimate of this increase has been made for years 2019/20 and 2020/21

3.2.4 DfT Pothole Action Fund (PAF)

DfT have provided additional funding of £250M nationally, over five years, from 2016/17, to repair carriageway damage resulting from the series of cold and wet winters recently experienced in the UK. The PAF is specifically to be used to repair potholed roads or to prevent potholes from forming.

3.2.5 NYCC Pothole Match funding

In May 2018, the County Council's Executive approved £3M of additional NYCC funding to match the extra DfT Pothole Action fund. A list of schemes to be funded from this package was agreed by the Corporate Director in consultation with BES Executive Members in July 2018. They are in the process of being delivered in the current financial year, with some schemes being carried over into 19/20. Further details can be found in Appendix D

3.2.6 Local Growth Fund (LGF) and related NYCC Contribution to Category 4 Roads Package.

The LGF allocation for 2018/19 was originally £3M; however, in May 2018 the DfT contacted the County Council to establish whether it could accommodate delivery of an extra £2M of LGF money by bringing it forward early into the £44M LEP package within 2018/19 from a future year. It was agreed that the County Council could accommodate this early funding by delaying its own £2M contribution funding. Depending on the year-end financial position further schemes may be funded from the Council's contribution to ensure the most efficient delivery of the LEP Package. This means the allocations for 2019/20 are expected to be £1.4M of LGF funding and £3.6M of NYCC Contribution.

Specific DfT Grants

3.3 National Productivity Investment Fund (NPIF)

The DfT announced the National Productivity Investment Fund as part of the 2016 Autumn Statement. In 2017/18 NYCC received an allocation of £5.104m to be spent in 17/18. £3.904m of this has now been spent but DfT gave approval to carry forward £1.2M into 2018/19 due to the re-profiling of the A1(M) junction 47 funding.

3.3.1 The second round of NPIF funding (NPIF2) was provided on the basis of bids. NYCC were successful with a bid for £3.2M for part of the West of Harrogate £4.6M Package. £950K is programmed to be spent in 18/19 with the remaining £2.25M of NPIF Grant to be spent in 19/20.

3.3.2 Safer Roads Fund

The DfT announced in the Autumn Statement of 2016 that a total of £175M of additional funding is to be targeted at improving the safety of 50 of England's local 'A' Road sections, where the risk of collisions causing death and serious injury is highest. North Yorkshire County Council has a responsibility for the following four roads on this list:

- A167 - Topcliffe to A61;
- A6108 - Ripon to Scotch Corner;
- A684 - M6 to A1(M) (Joint with Cumbria);
- A682 - Barrowford to A65 (Joint with Lancashire)

3.3.3 To date NYCC have received £8.6M of this grant, to be spent in 2018/19/20 with another £2.9M to be received in 2020/21

Re-profiled LTP Funding in 2019/20

3.4 In October 2018, the Chancellor announced in the Budget the Government was allocating a further £420M of new money for local highways maintenance. This additional resource has been allocated using the highways maintenance formula meaning that NYCC received £13.74M. £600K of this funding was specifically to fund extra costs relating to the Tadcaster Bridge repair. This additional Capital funding is for the repair of roads (including potholes), bridges and local highways infrastructure generally.

3.4.1 The Corporate Director BES and BES Executive Members approved the 2018/19 element allocation for this extra funding on 25 January 2019. Re-profiling of 18-19 budgets has ensured that, in line with the grant guidelines, the funding will be spent in 18/19. This re-profiling has released further LTP funding in 2019/20 at present estimated at £6.6M, confirmation of the actual outturn figure will be identified at financial year-end.

- 3.4.2 It is proposed that this remaining funding is spent in the following way:
- Proactive Coring. In order to have data relating to the tar content and composition of our network, it is proposed that cores be taken proactively on an annual basis with investigation focused on locations where network condition suggests that maintenance work is required in the near future. This process will only be required up to a point where we have a sufficient asset inventory relating to the tar content in our network which can then be maintained with future scheme work.
 - Remaining spend on Westborough / Northway Junction Scarborough (£100k of this £250k scheme was funded in 18/19)
 - Acceleration of future planned maintenance programme schemes in relation to the UCI and Tour de Yorkshire cycle race routes. These are the remaining routes that need to be delivered before August 2019
 - Additional maintenance schemes for locations where poor highway condition requires accelerated works to be delivered. This list was developed using network condition data in conjunction with input from the local area highway teams.

3.4.3 This suggested programme (Appendix F) is based on present estimate of costs. Any significant variations will be managed in year to ensure full spend of this grant.

4.0 Proposed Changes to 2019/2020 Programme

4.1 Appendix B sets out details for how the various sources of funding will be spent in 2019/20.

Bridges and Structures

4.2 The proposed Bridges and Structures headline allocation for 2019/20 for agreement by Corporate Director, BES in consultation with BES Executive Members is £2.09M. This programme is summarised in Appendix C and includes an allocation for PROW bridges.

Structural Highway Maintenance

4.3 Budgets for the 'top slice elements' of the 19/20 capital budget which facilitate the development of a programme in accordance with asset management best practice Were approved in July 2018 the following changes are recommended for approval;

Element	Description	Previously Agreed Allocation	Proposed Allocation
Network Condition Surveys	In previous years this figure has been £200K. Increases are sought to enable 100% of the network to be assessed annually. This will allow opportunities for capital delivery efficiencies by shortening the length of time from formally identifying defects to rectifying them.	£200K	£330K
Bridges AMX Software	This asset management software will require £32.6K to be initially set up and then support costs of £12.2K from then on.	£K0	£32.6k

4.4 Appendix D contains details of schemes not completed within the 2018/2019 financial year along with their respective estimated costs. These schemes are recommended to be delivered in 2019/20.

Structural Highway Maintenance Capital Programme 19/20

- 4.5 The revised 2019/20 Structural Highway Maintenance Capital Programme is set out in Appendix E, which contains details of the complete Structural Highway Capital programme for 2019/20. This includes the removal and replacement of sites where deterioration has subsequently occurred and the site condition is now beyond the threshold of the original planned treatment. These sites have then been replaced with other locations where a similar treatment can be applied and deferred to the following year's capital programme (20/21) for an alternative treatment where feasible. Any remaining schemes will also be reassessed the following year (21/22) to determine whether they should be put forward for an alternative treatment and in the interim all scheme locations will continue to be subject to regular inspections and reactive maintenance treatment in accordance with the Highway Safety Inspection Manual.

5.0 Proposed 2020/21 Headline Allocations

- 5.1 Information regarding indicative funding sources can be found in Appendix A
- 5.2 The funding is proposed to be allocated across the Programme as follows:

Programme Element	Proposed Funding Allocation
Street Lighting	800,000
Bridges and Structures	2,090,000
Integrated Transport	1,198,000
Structural Highway Maintenance*	35,832,000
Total	39,920,000

* This figure includes topslice allocations e.g.; Fees

- 5.2.1 This includes an ongoing allocation for PROW Bridges
- 5.2.2 The detailed capital works programme will be reported to Corporate Director BES and BES Executive Members in June/July 2019.

Potential additional funding streams

- 5.3 In addition to the funding sources mentioned in Appendix A there is potential for further grant funding;

Local Highways Maintenance Challenge Fund-

- 5.4 This fund is to enable local highway authorities in England to bid for major maintenance projects that are otherwise difficult to fund through the normal Needs Based formula they receive. The expectation is that Tranche 2b will be announced in 19/20

National Roads Fund

- 5.5 The £28.8 billion National Roads Fund (NRF) for 2020-2025 was announced in the Budget 2018 which delivers on the Government's commitment to hypothecate English Vehicle Excise Duty (VED) to roads spending. Within the NRF, the draft Roads Investment Strategy 2 (RIS2) will receive funding of £25.3bn. The remaining £3.5bn will be available for the Major Road Network and Large Local Major schemes.

- 5.5.1 Dft are seeking suggestions through Transport for the North (TFN) for 10 schemes that are available for short term deliverability on MRN only. NYCC are not in a position to bid for any of the pre 2020/21 funding, due to the short turnaround time for bids

National Productivity Investment Fund (NPIF)

- 5.6 The government will also make £150million of NPIF funding available to local authorities which aims to support projects across England that ease congestion on local routes and for small improvement projects such as for minor junction and road layout improvements. The expectation is that further details will be announced in 19/20.
- 5.6.1 It is anticipated that NPIF 3 will be focused on Pinch Point schemes for 2021.
- 5.6.2 DfT have indicated that there will likely be a further opportunity to bid for funding to improve highway 'pinchpoints'. This is likely to be available in 21/22 and 22/23. No further details on this have been announced as yet, but the overall funding pot is likely to be relatively small at around £75M available nationally and therefore it is probable that schemes will be around the £5M maximum level.

Transforming Cities Fund

- 5.7 This is a £2.5 billion transport fund to support connectivity in some of England's largest cities, launched at the Autumn Budget 2017 and expanded in the 2018 Budget with funding running from 2018-19 to 2022-23. Around half has been allocated to Mayoral Combined Authorities on a devolved basis with the remaining amount to be allocated across 12 cities.
- 5.7.1 West Yorkshire Combined Authority have been through the expressions of interest process and are now working with DfT to put forward a bid. NYCC are working in conjunction with WYCA and the district councils on packages of schemes in Harrogate, Skipton and Selby, with a combined total value of up to £35M

Future High Streets Fund

- 5.8 This is a Government fund of £675M nationally available to District Councils (In two tier areas) to help rejuvenate struggling High Streets. The criteria for the fund does allow funding for transport initiatives that may help rejuvenate the High Streets.
- 5.8.1 Having looked at the prospective round 1 and round 2 FHSF bids from the North Yorkshire District Councils we are confident that we can provide suitable input to the transport aspects of all the suggested bids. We have identified lead officers, mainly from the Transport Planning Team, to work with each of the District Councils over the coming months.

6.0 Financial Implications

- 6.1 Sections 3 and 4 above and Appendices A to F attached set out and summarise the financial aspects of this report relative to the 2019/20 capital works programmes.
- 6.2 The contents of this report make no changes to the BES Capital Plan expenditure limits.

7.0 Equalities Implications

- 7.1 Consideration has been given to the potential for any adverse equality impacts arising from the recommendations. The principles and documents discussed in this report are recommended for use in the Well-managed Highway Infrastructure Code of Practice. Officers consider that there are no adverse impacts arising from the recommendations in this report.
- 7.2 A copy of the 'Record of Decision that Equality Impact Assessment is not required' form is attached as Appendix G.

8.0 Legal Implications

- 8.1 The County Council, in its capacity as the Local Highway Authority, Street Authority and Local Traffic Authority must act in accordance with a wide range of statutory powers and duties imposed by legislation.
- 8.2 The proposed capital programme allocations and schemes have been developed and prioritised in line with the relevant legislation such as the Highways Act 1980, the New Roads and Street Works Act 1991, the Road Traffic Regulation Act 1984, the Transport Act 2000, the Traffic Management Act 2004 and the Flood and Water Management Act 2010.
- 8.3 In particular, Section 41 of the Highways Act 1980 imposes a duty of maintenance on highway authorities in respect of highways maintainable at public expense.

9.0 Recommendations

- 9.1 It is recommended that the Corporate Director BES in consultation with the BES Executive Members
- i) Approve the 2019/20 Capital Allocations and Works Programme as contained within this Report.
 - ii) Approve the indicative Allocations for 2020/21 as contained within this report
 - iii) Approve the Schemes proposed for the re-profiled 2019/20 LTP allocation as proposed in this report

7	<i>Gowthorpe, Selby</i>	£130,000
	<i>To be managed in year</i>	£29,761

Initial equality impact assessment screening form (As of October 2015 this form replaces 'Record of decision not to carry out an EIA')			
This form records an equality screening process to determine the relevance of equality to a proposal, and a decision whether or not a full EIA would be appropriate or proportionate.			
Directorate	BES		
Service area	H&T		
Proposal being screened	BES Executive Member Report – Highways Capital Programme 2019/20		
Officer(s) carrying out screening	Andy Davies		
What are you proposing to do?	To seek Corporate Director, Business and Environmental Services (BES) in consultation with BES Executive Members, approval for changes to the Highways Capital Programme for Street Lighting, Bridges and Structures, Integrated Transport and Structural Highway Maintenance for 2019/20		
Why are you proposing this? What are the desired outcomes?	Approval to spend the Highways Capital Budget on identified schemes.		
Does the proposal involve a significant commitment or removal of resources? Please give details.	Yes- approximately £50million of Capital funding in line with the limits set in the BES Capital Plan.		
Is there likely to be an adverse impact on people with any of the following protected characteristics as defined by the Equality Act 2010, or NYCC's additional agreed characteristics? As part of this assessment, please consider the following questions: <ul style="list-style-type: none"> To what extent is this service used by particular groups of people with protected characteristics? Does the proposal relate to functions that previous consultation has identified as important? Do different groups have different needs or experiences in the area the proposal relates to? If for any characteristic it is considered that there is likely to be a significant adverse impact or you have ticked 'Don't know/no info available', then a full EIA should be carried out where this is proportionate. You are advised to speak to your Equality rep for advice if you are in any doubt.			
Protected characteristic	Yes	No	Don't know/No info available
Age		✓	
Disability		✓	
Sex (Gender)		✓	
Race		✓	
Sexual orientation		✓	
Gender reassignment		✓	
Religion or belief		✓	

Pregnancy or maternity		✓	
Marriage or civil partnership		✓	
NYCC additional characteristic			
People in rural areas		✓	
People on a low income		✓	
Carer (unpaid family or friend)		✓	
Does the proposal relate to an area where there are known inequalities/probable impacts (e.g. disabled people's access to public transport)? Please give details.	No		
Will the proposal have a significant effect on how other organisations operate? (e.g. partners, funding criteria, etc.). Do any of these organisations support people with protected characteristics? Please explain why you have reached this conclusion.	No. The report focuses on the overarching capital maintenance funding position.		
Decision (Please tick one option)	EIA not relevant or proportionate:	✓	Continue to full EIA:
Reason for decision	The allocation of funding is based on the "Manage, Maintain and Improve" (MMI) hierarchy set out in Local Transport Plan 4, which has been the subject of an Equality Impact Assessment (EIA). This concluded that the introduction of fewer improvement schemes may have a greater impact on people with mobility difficulties or without access to a private vehicle as there will be fewer new facilities provided e.g. pedestrian crossings, dropped kerbs, bus stop accessibility improvements; however, it is also considered that prioritising maintenance, particularly for footways, through the MMI hierarchy is likely to produce a net benefit for people with the same protected characteristics; particularly in terms of age and disability.		
Signed (Assistant Director or equivalent)	Barrie Mason
