

# Care and Independence Scrutiny

## Health Integration

Thursday 22nd March 2018

# Health Integration

## CONTENT

1. National policy
2. Integrated commissioning
3. Integrated provision

# National Policy

Care Act 2014

NHS 5 Year Forward View

New Models of care – vanguards, multi-specialty providers, integrated care systems etc.

Sustainability and Transformation Partnerships – not just plans

Integration and Better Care Fund Plan – linked to investment

It is intuitively the right thing to do - person at centre, seamless, good outcomes...

## North Yorkshire: a unique place

Whole population health and wellbeing

NYCC: a strong partner in primary, community and social care alliance for integration

### Integrated Commissioning

Joint population-based planning

Strategic County-wide whole population

Locality level with strong GP leadership

### Integrated Community Services

Provider partner and joint ventures

Alignment to new social care pathway

Innovative models for community services

### Integrated Capacity and Resources

Organisational leadership

Strong lead provider for shared services

Joint posts and resources

Internal 2020 programme

# Integrated Commissioning

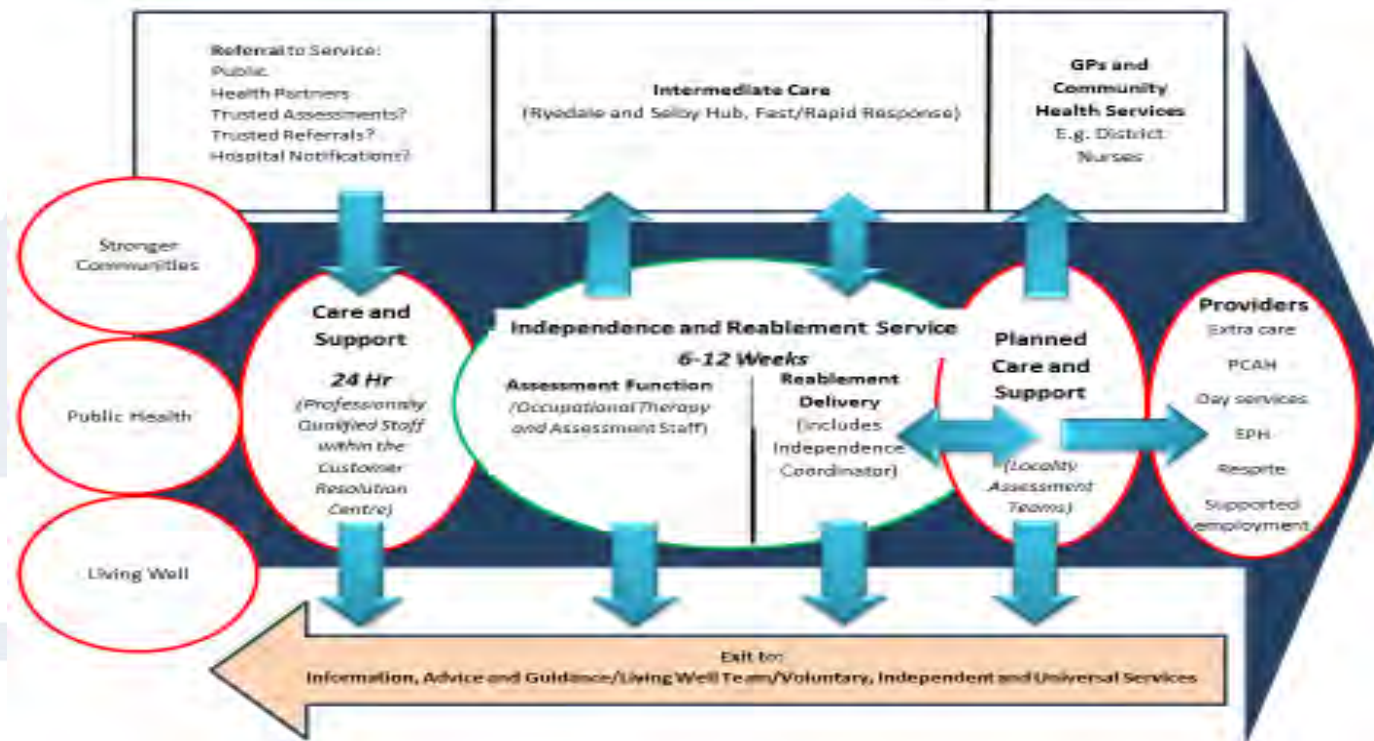

- **Set up an Integrated Planning & Commissioning Board underpinned by a section 75 agreement with aim of:**

‘sharing planning, oversight and commissioning arrangements for the people in Scarborough and Ryedale so that more joined up decisions can be made by each organisation and not just for those areas which have a pooled budget.

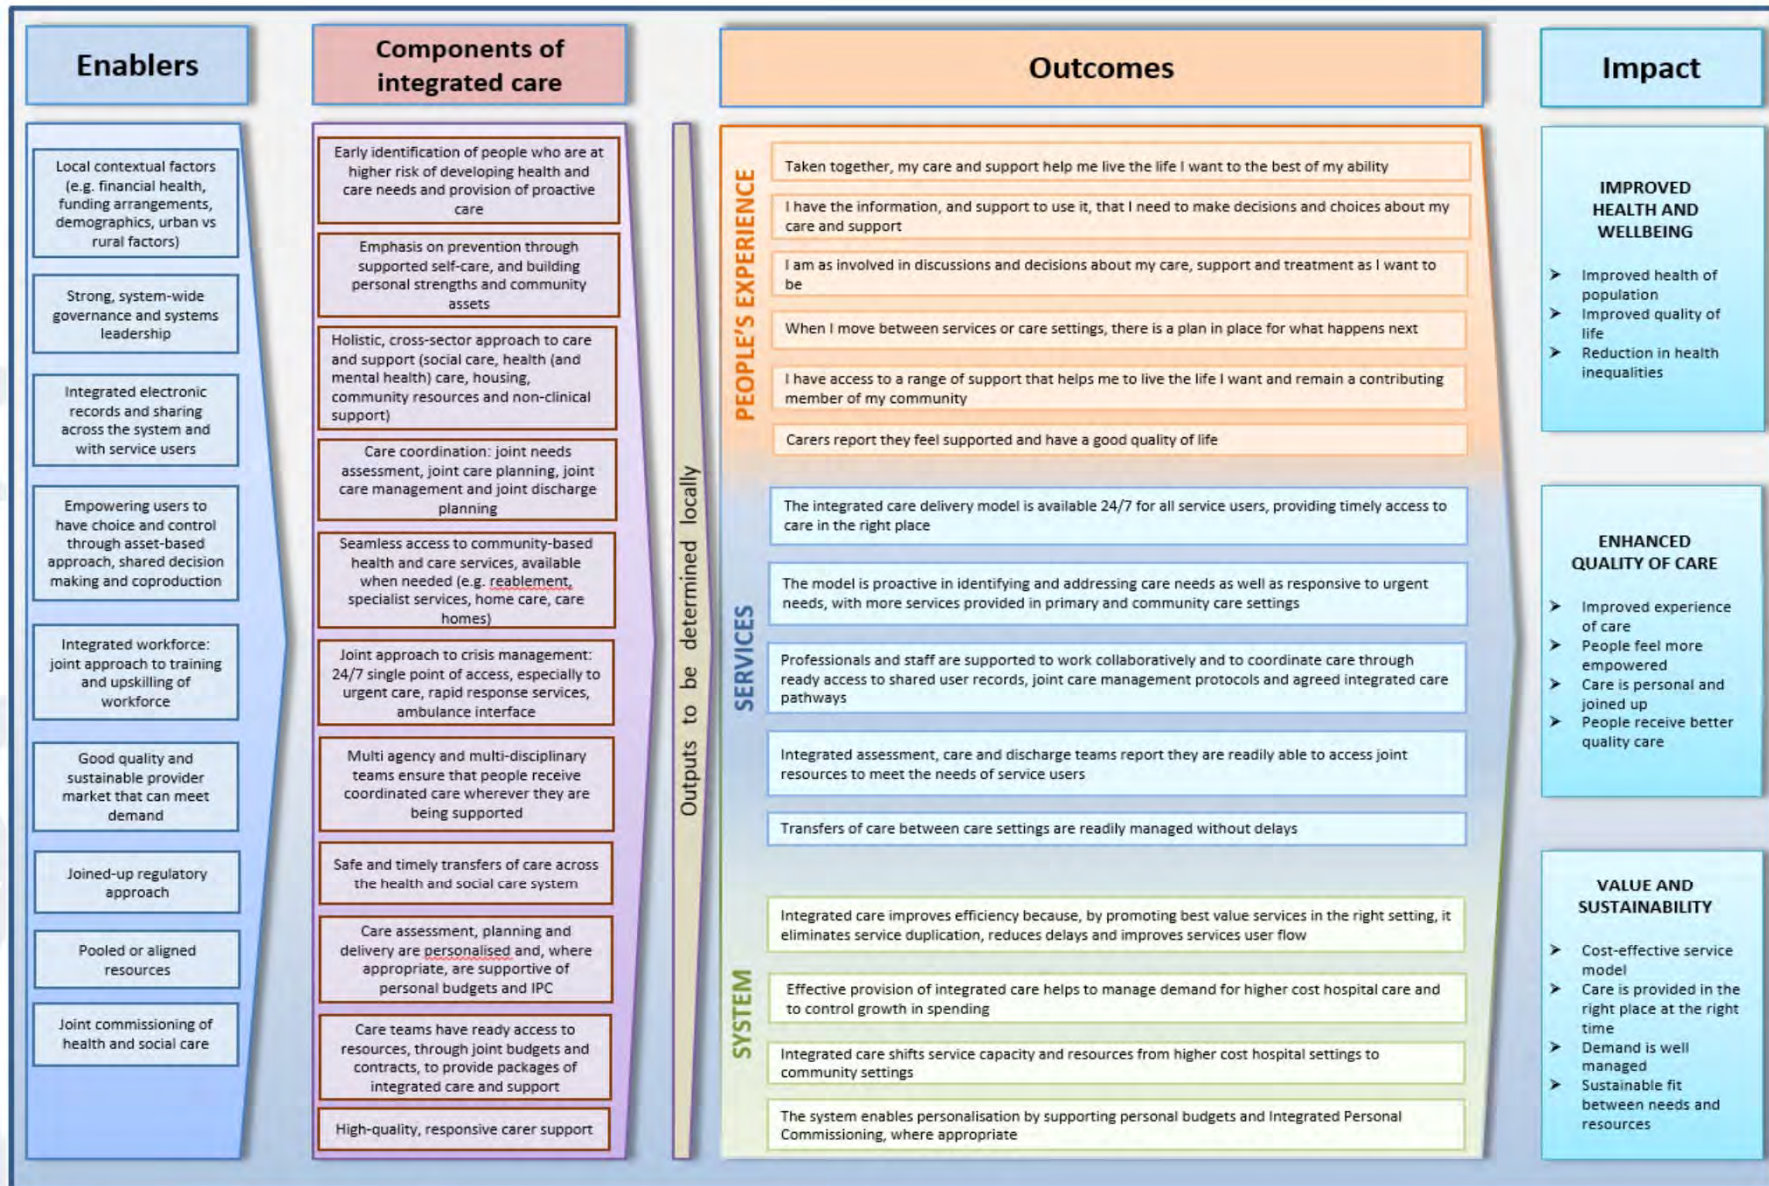

The aim is to create a venue for shared strategic thinking and making better informed decisions for the public, which will be able to discuss all expenditure and prevention work across the NHS, public health and adult social care by the parties’.

- **Joint Commissioning Strategy and shared work programme.**

# Integrated Provision North Yorkshire County Council Pathway

# SCIE Integration Model

# Integration with Community Health Services

- a common set of pathways and protocols;
- work with populations based 'hubs' 30,000-50,000 populations and a virtual integrated team approach with primary care;
- develop and support local 'transfers of care' protocols for hospital discharge;
- move towards 'trusted assessor' framework to reduce duplication;
- Explore joint workforce development;
- Develop appropriate data sharing protocols;
- Develop a shared approach of a single view of the record for the individual and a single shared plan;
- Develop and support preventative initiatives.

# How we work strategically with NHS

- Health and Wellbeing Board
- Local Strategic Groups
- A&E Delivery Boards
- Delayed Transfers of Care discussions on a daily basis
