

44/09 - **OVERVIEW AND SCRUTINY PERFORMANCE MEASURES:** The Policy Support Officer submitted a written report which updated Members on how the performance of Overview and Scrutiny was currently measured and outlined proposals for future measures of performance. The Scrutiny Officer referred Members to section 5.4 of the report which set out proposed performance indicators and sought Members' input.

Members raised concern over a number of the indicators in terms of whether they were effective ways of measuring performance and a general discussion ensued on whether there was a need for performance indicators and the best way to measure the performance of the Commission. The Scrutiny Officer stated that it was for Members to agree their own ways of measuring performance and it was **agreed** that the item be deferred to the next meeting of the Commission for consideration and that Members consider the most appropriate ways that they would like the performance of the Commission to be measured.
