NO.	ІТЕМ	ACTION
36	WELCOME AND INTRODUCTION BY THE CHAIR	
	County Councillor Carl Les welcomed Members of the Board and any members of the public or media viewing the meeting.	
	He advised that he is the Leader of North Yorkshire County Council and the Chair of this Board and that:-	
	- the main role of this Board is to support the effective communication of the test, trace and contain plan for the county and to ensure that the public and local businesses are effectively communicated with;	
	- decisions of the Board are purely advisory and its recommendations will be considered through the governance arrangements of the bodies represented, which retain their decision making sovereignty	
	- the papers for this meeting had been published in advance on the County Council's website.	
	- the Board comprises:-	
	<ul> <li>Three other County Councillors – Caroline Dickinson, Michael Harrison and Stuart Parsons</li> </ul>	
	<ul> <li>Representatives – generally the Leaders – of each of the 7 District Councils in North Yorkshire</li> </ul>	
	The Chief Executive, Director of Public Health and Director of Health and Adult Services for North Yorkshire	
	The Police, Fire and Crime Commissioner	
	The Chief Constable	
	<ul> <li>Representatives of Business; the Care Sector; Healthwatch; the NHS: Public Health England; Schools; and the Voluntary and Community Sector (VCS)</li> </ul>	
	- people can see the names of everyone on the Board and the organisations they represent on the Council's website.	
37	APOLOGIES	
	As stated in the attendance on the previous page.	
38	DECLARATIONS OF INTEREST	
	There were no declarations of interest.	
39	NOTES OF MEETING HELD ON 30 <sup>TH</sup> JULY 2020	
	AGREED that these were an accurate reflection of the discussion.	
	(There were no matters arising.)	

<ul> <li>UPDATE ON THE CURRENT POSITION IN NORTH YORKSHIRE</li> <li>Slides had been circulated with the Agenda containing data internationally; for the UK; North Yorkshire and by District; and information on Theme 2 of the Outbreak Management Plan – High Risk Locations.</li> <li>Lincoln Sargeant advised that, over the last few weeks, there has been an average of 3 cases per day of people testing positive. This has increased to 5/6 people per day in the last week or so. There are three categories evident: <ul> <li>the majority of spread is within households;</li> <li>we are seeing an increase in the number of cases in Care Homes due to more pro-active testing of both residents and staff; and</li> <li>the number of outbreaks has been kept relatively low and have occurred in workplace settings; factories and the hospitality sector</li> </ul> </li> <li>The low level of rates in the county give us confidence that there is no immediate likelihood of any lockdown action being required, although we remain vigilant.</li> <li>Victoria Turner advised of the recent change in the reporting of deaths in England. Initially, everyone who died who had had a positive test for Covid-19 had been included in the figures. Public Health England had reviewed the data and introduced two new measures:-</li> <li>Those who had died within 28 days of a positive test, if Covid-19 appeared as a reason on the Death Certificate.</li> <li>Other data, such as the number of excess deaths, will continue to be monitored.</li> <li>Councillor Foster mentioned that Craven feel on the frontline, given their proximity to some neighbouring areas with high rates of infection and asked if there is any advice to employers. Lincoln Sargeant stated that this was being looked at. There are some situations that can be linked to cross border working, but there are not many at the moment. His Team work closely with Public Health England so that, where there are out oreaks, it is possible to track back if employees visited any areas with high levels of circulating</li></ul>

2 of the Outbreak Management Plan – High Risk Settings. Katie Needham, who leads this Theme, with Rachel Richards, a fellow Pubic Health Consultant, talked through this aspect.
Theme 2 has been sub-divided into three main areas:-

<ul> <li>Workplaces (which include closed essential business – production processes and packaging plants and military bases).</li> </ul>	
- Communal accommodation settings (such as people who are drug and alcohol dependent; homeless people; people fleeing from abuse and violence; supported accommodation and Houses of Multiple Occupation.	
- Hospitality, Leisure and Tourism. This category is very wide ranging and includes hotels, self-catering accommodation; camping and caravan parks and amusement arcades.	
There is also a new sub-theme – Events. This encompasses things like Remembrance Sunday and outdoor music events.	
There are three main responses:-	
- Universal information.	
- A more targeted response, working proactively with the setting concerned.	
- Responding to an outbreak and providing a range of support and advice.	
There have been a number of achievements so far including:-	
- in liaison with partners, the development of a range of products that support preventative work and outbreak management;	
- Action Cards that dovetail with national Action Cards to provide an outline of the local notification process and response;	
<ul> <li>a Public Health offer has been developed to reflect the needs of High Risk Settings; and</li> </ul>	
- regularly working with tenants and landlords to better understand and support them with any outbreak in Houses of Multiple Occupation.	
Next steps include testing out plans; continuing to support businesses to navigate Covid-19 secure guidance and sharing/disseminating action points.	
Councillor Parsons commented that there seems to be confusion in retail establishments as to the wearing of facemasks. A lot of shop workers are not wearing facemasks and this is causing some concern. A standardised message is required. Lincoln Sargeant advised that Pubic Health is reinforcing national messages and, where there are serious concerns, working with District Council colleagues to follow these up. Customers should feel able to have a polite word with the Manager about their concerns as there is not the capacity to follow up on all concerns. Councillor Parsons advised that the people who had contacted him had tried this approach to no avail. That is why he considers a standardised message necessary.	
The Chair suggested this be picked up further under the Communications Update.	
NOTED.	

1	
	YOND THE DATA: UNDERSTANDING THE IMPACT OF COVID- ON BLACK, ASIAN AND MINORITY ETHNIC GROUPS
Slid	es had been circulated with the Agenda.
	coln Sargeant introduced this Item. It had become clear that certain ups suffered disproportionately.
(BA For bec Sim	erms of people from Black, Asian and Minority Ethnic Groups ME), he wanted to engage the Board in a sophisticated response. example, it would be a knee jerk response to shield all males, just ause they are more likely to die from Covid-19 than women. ilarly, our analysis of this report must be more nuanced, than king for one single, explanatory factor.
	oria Turner took Members through the slides. Among the points highlighted were:-
-	the reports do not take into account other important factors such as occupation, co-morbidities, obesity or genetics;
-	Key workers are more likely to be from BAME background;
-	a higher death rate is occurring in lower skilled occupations;
-	risks associated with transition morbidity can be increased by the housing challenges faced by some members of BAME groups;
-	some pre-existing conditions that increase the risk are more common in BAME groups;
-	poor examples of healthcare at work and historic racism can make people from BAME groups less likely to seek medical help; and
-	there are clear links to economic disadvantage
Eng are con	coria outlined the seven recommendations in the Public Health gland Report, together with ideas as to how we should respond and as of potential focus, which included targeted work with BAME munities and individuals and consideration of ethnicity as part of Joint Strategic Needs Assessment.
revi	ere were links into wider work being undertaken, such as the ews by West Yorkshire and Harrogate, and Humber Coast and e Health and Care Partnerships.
shie	oria Ononeze emphasised that the approach should not be to eld people who are from BAME communities but to address the er issues outlined by Victoria Turner. This is a system issue.
ces of Sar on the Also	uncillor Parsons commented that, since responsibility for smoking sation had transferred from GP Practices, there was less mention it within practices. A coherent approach is required. Lincoln geant advised that there is such an approach but it is dependent GP Practices signing up, as it is on a voluntary basis. He agreed re is a need for GP Practices to be at the forefront of these efforts. b, whilst smoking rates in the county are generally low, the llenge is within particular groups.

	<ul> <li>Dr. Sally Tyrer stated that, as part of healthy living advice, hope that all practices still offer advice on stopping smokin is just signposting to where further support is available, there is a limit as to how much advice can be provided conversation with patients.</li> <li>Leah Swain added that the VCS can use their links to ensuget the right information on Covid-19 and health support for underlying conditions. She wondered whether we could lo existing models i.e. raising awareness of the impact of cold on people's health.</li> </ul>	g, even if it . However, d in a brief ure people or ok at d homes
	She added that colleagues in Darwen are looking at local to BAME groups. Could we have support at Test Centres to a people to other health advice? Lincoln Sargeant welcomed suggestion. As more responsibility shifts to local governme and trace, having good, local, trusted relationships will be engaging with communities.	signpost I this ent for test
42	COMMUNICATIONS UPDATE	
	Faye Hutton updated verbally as follows: -	
	- Test and Trace universal communication packs are available and have been widely disseminated. These high level messaging about face covering; how to keet;	e include
	- the website is now live with extra support and guidar different settings, including tourism. Communication available in several languages. These are being sha partners so they can be disseminated and spread ac county to support businesses and tourism;	Packs are red with
	- roadside signage has been put up, with a press releated around this. There are 100 signs on how to stay safe preventative messaging, including keeping areas su inside of cars clean for people who may be sharing a from work;	e and ch as the
	- Key messages have gone to 18,000 residents of No Yorkshire with the end of shielding letter;	rth
	<ul> <li>we have increased our visibility by boosting our targe media activity for specific areas in the county, where busier – such as key tourist spots; and coastal areas</li> </ul>	e it may be
	<ul> <li>based on feedback from partners, Packs are being p in different formats – e.g. easy read and audio version support vulnerable people;</li> </ul>

## **Outbreak Management Advisory Board – 16 September 2020**

### PLEASE NOTE:

The data presented to the meeting will be updated, given the dynamic changes we are seeing.

Data pack produced – 9<sup>th</sup> September 2020 Produced by Leon Green / Emel Bagdatlioglu

# International

### **Global situation**

The WHO reports:

- 27,417,497 confirmed cases (up 1.88m since last week)
- 894,241 deaths (up 42,200 since last week)
- 216 areas / nations with cases

Dashboard accessed 10:30 BST 09/09/20. Data will reflect different reporting timeframes.

### **Comparison with Europe**

The table to the right shows total numbers and 14-day COVID-19 case notification rate per 100,000.

The UK is ranked 12<sup>th</sup> for new cases (up from 18<sup>th</sup>) after Austria, Portugal and Hungry and joint 13<sup>th</sup> for deaths (unchanged).

Total cases in the UK are second highest after Spain and total deaths are highest in Europe, but subject to variation in death registration practices between countries.

Source: European Centre for Disease Prevention and Control

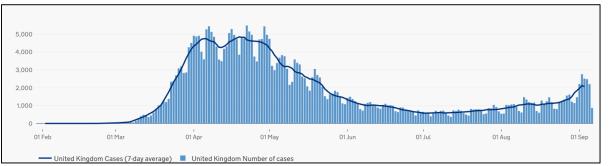

Rank	Country	Cases	Deaths	(
1	USA	6,248,989	188,172	ו 1
2	India	4,370,128	73,890	-
3	Brazil	4,147,794	126,960	1
13	UK	350,104	41,554	,

Globally, cases now exceed 27 million and over 800,000 deaths to date.

The UK has the 13<sup>th</sup> highest total cases globally and the 5<sup>th</sup> highest number of deaths in the world.

Public Health England data shows there were 352,560 lab confirmed cases in the UK on 8<sup>th</sup> September, up by 434 from the previous day. This is more recent than the data reported by the WHO.

The UK, the rolling average of daily new cases saw a minimum of 546 on 5<sup>th</sup> July and has increased slowly since, with the latest average at 2,460 daily cases.

### Deaths

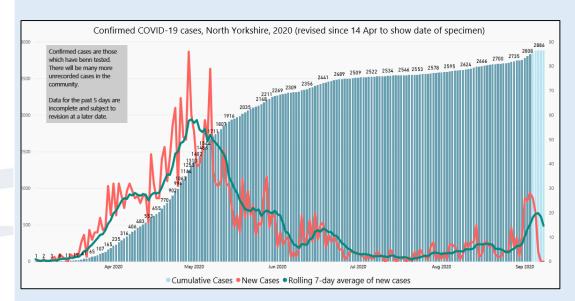

As of the 8<sup>th</sup> September, there have been 41,594 deaths recorded in the UK, up by 25 from the previous day.

#### The UK rolling average continues to reduce, with 10 average daily deaths recorded most recently.

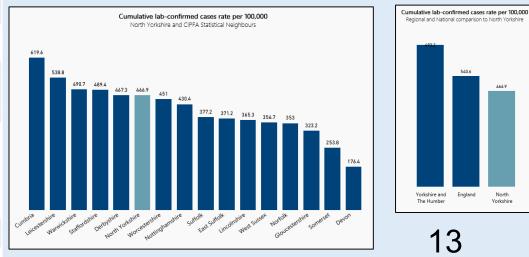

PHE revised the presentation of deaths to include all the deaths of people who have had a positive COVID-19 test result from a Public Health or NHS laboratory within 28 days of death. The data do not include deaths of people who had COVID-19 but had not been tested, people who were tested positive only via a non-NHS or Public Health laboratory, or people who had been tested negative and subsequently caught the virus and died. Deaths of people who have tested positively for COVID-19 could in some cases be due to a different cause.

# North Yorkshire

#### Cases

#### Rates

#### Cases

The number of cases of COVID-19 in North Yorkshire continues to increase. At 8<sup>th</sup> September, there have been 2,886 positive tests since 3<sup>rd</sup> March.

There have been 180 new cases reported in the past two weeks. The rolling average of new cases has decreased slightly and is at 15 cases per day.

#### Rates

North Yorkshire Compared with 15 other statistical neighbour local authority areas, North Yorkshire is ranked 6<sup>th</sup>, with 466.9 cases per 100,000 population. The three areas with the lowest rates are all in the South West region, which has been less affected by COVID-19 to date.

The North Yorkshire rate is lower than both the England and Yorkshire & Humber rates.

# Deaths

### Estimated hospital deaths

#### Care homes

15

#### **Hospital deaths**

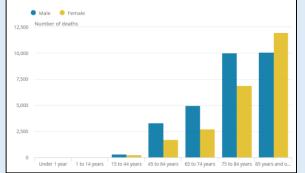

Estimates suggest about 259 deaths in hospital for North Yorkshire residents, unchanged since 20<sup>th</sup> July. As well as the four main hospital trusts, this total includes additional estimated deaths from other surrounding hospital trusts: Darlington, Leeds, Mid Yorkshire, Morecambe Bay and Bradford.

#### **Care home deaths**

239 deaths in care homes up to 28th August, up from 235 in previous report (to 11<sup>th</sup> August).

### Age and sex (national data)

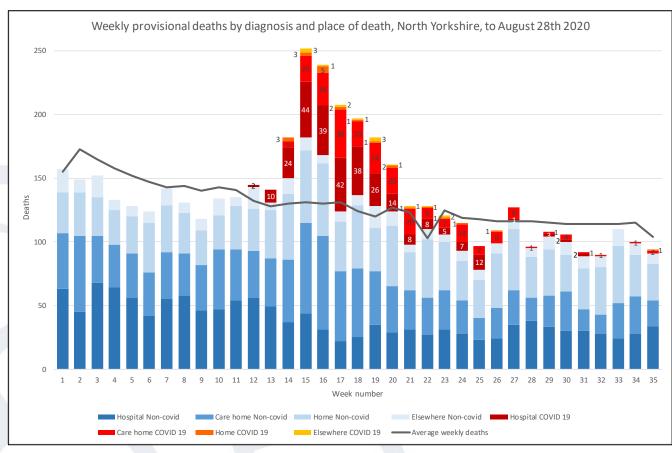

Number of deaths involving COVID-19 by sex and age group, England and Wales, registered between 28 December 2019 and 28 August 2020

#### Age and sex

Nationally, the number of deaths involving COVID-19 remains higher in the older age groups than in younger age groups. The highest proportions of deaths involving COVID-19 are in people aged over 75 years.

# ONS provisional weekly deaths to 28th August

For week 35, there were 94 deaths reported in North Yorkshire. This is 10 (10%) below the longterm average of 104 for week 33 and 6 lower than week 34 (100 deaths).

There were 3 death attributable to COVID-19, up from 1 death in week 34.

In week 35, COVID deaths comprised 3% of all deaths in the county, up from 1% in week 34 and lower than 40% in week 17.

To 28<sup>th</sup> August 2020, there have been 4,831 deaths in North Yorkshire from all causes and 563 (11.7%) from COVID-19. 31.0% of deaths from all causes have occurred in care homes. There have been 239 deaths in care homes from COVID-19, 42.5% of all COVID deaths.

6

#### Weekly provisional deaths by diagnosis and place of death, North Yorkshire, (to 28<sup>th</sup> Aug 2020, wk 35)

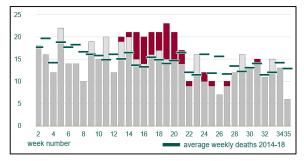

Charts show number of deaths by district. Non-Covid shown grey, Covid-coded deaths shown red. This week there were Covid-19 deaths in Hambleton and Harrogate districts. Total deaths increased in Hambleton, Ryedale and Scarborough districts.

# Theme 1 B – Educational Settings

## PH Consultant Lead Victoria Ononeze

Outbreak Management Advisory Board 16<sup>th</sup> September 2020

19

# **Educational settings**

- Early years (e.g. preschool, nurseries and childminders, children centres)
- Primary and secondary schools
- Special schools
- Pupil referral units
- Private schools
- Colleges and university
- Out of school settings (e.g. out of school clubs, youth clubs, sports club and village halls)

# Achievements to date

- Dedicated PH and CYPS team supporting settings building on established communications channels with educational settings
- Proactive support to prevent infections and transimission (e.g. risk assessment; guidance on infection control measures, school transport, staff visit to schools and homes, etc)
- Local process supporting proactive identification and management of suspected and confirmed covid cases
  - Majority of lab confirmed cases in/associated with schools before summer holidays were in adults - parents 75% and staff 21%
- No 'outbreaks' to date
- Joint PHE/ LA plan to manage outbreaks

# **Next steps**

- Support settings to continue to navigate covid secure guidance
- Working with colleges and university to:

   prevent transmission of infections
   respond to single cases
   jointly plan to manage potential outbreaks
- Proactive comms for children and young people
- Share and disseminate good practices across settings

### **Digital Ad Vans**

Visited: Settle, Harrogate, Ripon, Easingwold, Scarborough, Whitby, Malton/Norton and Richmond.

### Newspaper/ online advertisement

Print advertisement in the following publications: **D&S** Times Northern Echo York Press Craven Herald Ryedale Gazette and Herald Harrogate Advertiser Series (Harrogate Advertiser, Knaresborough Post, Wetherby News, Nidderdale Herald & Ripon Gazette) Whitby Gazette Scarborough News **Bridlington Free Press** 

# Young people

## <u>Aims:</u>

- Engage with young people across North Yorkshire
- Curb the rise of coronavirus cases amongst younger people
- Utilise the youth voice to create engaging communications that will resonate with the younger audience
- Two-step communications: Secondary school students & young people 18+
- ✓ 6 person law aimed at younger people

## **Behavioural Insights:**

- Young people are heavily influenced by who communicates the message – particular influencers are from the voices of peers and others of their age group including celebrities/influencers which could be harnessed.
- Highlighting losses/ gains which are important to them, how their behaviour is impacting e.g.:
  - Risking recovery/ avoid further lockdown
  - Hurting/harming important others (e.g. family, partnews family, vulnerable YP) 25

# **Targeted messages**

## Young people

- Secondary school students messaging aimed at students actions outside of school: 6 people maximum, social distancing, playing their part to reduce the risk and avoid local lockdown.
- Posters for schools/ community centres etc.
- Video footage Whatsapp conversation with key messages.
- Video footage using students saying why things will be different this year and what they need to do to support the country and keep people safe.
- Influencer messaging using a celebrity name
- Working with youth council groups, schools and colleges directly and other LA's to support our messaging

### <u>Pubs</u>

- Stickers for pub windows and mirrors across North Yorkshire with targeted messaging
- Environmental Health Officers will be required to support the dissemination of the stickers to each pub in their district

26

## Resources

Video created to mimic a real-life text conversation between two younger people about going out and the importance of looking after those more vulnerable to coronavirus.
