

NORTH YORKSHIRE COUNTY COUNCIL
PENSION FUND COMMITTEE

18 SEPTEMBER 2014

**PERFORMANCE OF THE FUND'S PORTFOLIO FOR THE QUARTER
ENDING 30 JUNE 2014**

Report of the Treasurer

1.0 PURPOSE OF REPORT

- 1.1 To report the investment performance of the overall Fund, and of the individual Fund Managers, for the Quarter to 30 June 2014.

2.0 PERFORMANCE REPORT

- 2.1 The Fund Analysis & Performance Report (**Appendix 1**) produced by BNY Mellon Asset Servicing (MAS) provides a performance analysis of the North Yorkshire Pension Fund for the quarter ending 30 June 2014.
- 2.2 The report highlights the performance of the total Fund by asset class against the customised Fund benchmark. It also includes an analysis of the performance of each manager against their specific benchmark and a comparison of performance levels over time.

3.0 PERFORMANCE OF THE FUND

- 3.1 The absolute overall return for the quarter (+0.6%) was below the customised benchmark for the Fund (+1.1%) by 0.5%.
- 3.2 The 12 month absolute rolling return was +12.9%, 4.4% above the customised benchmark.
- 3.3 Absolute and relative returns over the rolling years to each of the last four quarter ends were as follows.

| Year End | Absolute % | Relative % |
|-------------------|-------------------|-------------------|
| 30 June 2014 | +12.9 | +4.4 |
| 31 March 2014 | +12.0 | +6.1 |
| 31 December 2013 | +20.9 | +5.5 |
| 30 September 2013 | +22.5 | +6.2 |

- 3.4 The performance of the various managers against their benchmarks for the Quarter ended 30 June 2014 is detailed on page 8 of the MAS report and in **Section 4** below. This performance is measured on a time-weighted basis and expressed as a +/- variation to their benchmark.

- 3.5 The Appendices used in this report have been designed to present a fuller picture of recent investment performance.

Appendix 2 Fund Manager Performance over the three years to 30 June 2014 in absolute percentage terms from a starting point of "100"

Appendix 3 Performance of NYPF relative to other LGPS Funds over the last ten years

Appendix 4 Solvency position (in % and £ terms) since the 2001 Triennial Valuation; this Appendix also shows in absolute terms the +/- in the value of assets and liabilities of the Fund

Appendix 5 Solvency graph – this shows the key figures from Appendix 4 since March 2004 in a simple graphical format

- 3.6 The separate reports of the Investment Adviser and Investment Consultant explain what has been happening in the financial markets and to NYPF's investments, and look ahead over the short, medium and longer term.

4.0 FUND MANAGER PERFORMANCE

- 4.1 In monetary terms, the positive absolute return of +0.6% in the Quarter increased the invested value of the Fund by £11.7m. Eleven of thirteen managers and funds added value, with 7 managers outperforming their respective benchmarks. At the end of the June 2014 quarter the value of the Fund was £270m above the value at the end of June 2013, an increase of 15%.
- 4.2 Appendix 3 shows the performance of NYPF relative to other Funds in the LGPS universe. NYPF underperformed the local authority average by 1.4% for the quarter. NYPF has shown a strong and consistent correlation to the performance of other LGPS funds over the last 10 years but has tended to relatively outperform when markets are rising and underperform in falling markets conditions. This reflects a greater inherent potential for volatility in the NYPF Investment Strategy relative to many other LGPS funds.

Overseas Equities

- 4.3 Fidelity produced a negative relative return in the quarter of -0.2% on a benchmark return of +1.9%. Performance over the year to June 2014 was +1.0% relative. Since inception in November 2008 the manager has exceeded the benchmark by 0.2% pa (gross of fees).

During June 2014, NYPF transferred £21m from Fidelity for rebalancing purposes

Global Equities

- 4.4 The Global Alpha fund managed by Baillie Gifford produced a negative relative return (-2.3%) against a benchmark return of +2.7%. This is the first quarter of under-performance following an exceptional run of outperformance in nineteen of the last twenty quarters. The Fund remained 1.6% above the benchmark for the year to June 2014.

The LTGG fund, also managed by Baillie Gifford, produced a positive relative return (+0.8%) against the benchmark of +2.7% for the quarter. The relative figure for the year to 30 June 2014 was +13.3%, reflecting the previous outstanding out-performance.

UK Equities

- 4.5 Standard Life produced a negative relative return (-2.5%) in the quarter against the FTSE 350 equally weighted benchmark return of -1.4%. Relative performance for the year remains above the benchmark at +0.6%.

During June 2014, NYPF transferred £63m from Standard Life for rebalancing purposes.

Fixed Income

- 4.6 ECM produced +1.1% relative against the cash benchmark for the quarter and +4.9% relative for the year to June 2014. The performance target is to beat the cash benchmark by 3% each year.
- 4.7 Between July 2005 and May 2007 NYPF invested £125m with ECM. The valuation reached a peak of £141m in December 2007, dropped to a low point of £58m in February 2009. By the end of June 2014 the value of the investment stood at £127.3m.
- 4.8 Amundi performed below the benchmark (+1.6%) by -0.5% in the quarter and was -1.10% below it for the year to June 2014. The performance target is to exceed the benchmark by +2.5% each year.

The investment with this manager has proven to be a moderate contributor to Fund performance, outperforming liabilities since inception (+0.9% pa).

- 4.9 The investment in Gilts with M&G produced +1.5% against a liability matching benchmark of +1.6% for the quarter to June 2014, giving a -0.1% relative performance figure. Year to date performance was above the benchmark by +0.7%. The performance target is to exceed the benchmark by +0.5% (net of fees) each year.

Property

- 4.10 Investments were made into the LGIM and Threadneedle Property Funds during June 2014
- 4.11 The investments with Hermes, Threadneedle and L&G produced +2.1%, +4.7% and +0.3% respectively in relative terms, against the RPI benchmark of +0.6% for the quarter to June 2014.

Diversified Growth Funds

- 4.12 The Investment with the Standard Life Global Absolute Return Strategy (GARS) Fund and the Newton Investments Real Return Fund produced relative

outperformance of +1.3% and +1.0% respectively against a cash benchmark of +0.1%.

5.0 RISK INDICATORS

- 5.1 The Report (pages 10 and 11) includes three long-term risk indicators.
- 5.2 The Fund's annualised **Standard Deviation**, which is a reflection of volatility, is 10.0% for the rolling three year period to June 2014, 1.9% above the benchmark.
- 5.3 The **Sharpe Ratio** is a measure of how well the return compensates an investor for the risk taken. A higher Sharpe Ratio reflects a better return for a given level of risk or lower risk for a given level of return. The ratio for the Fund for the rolling three year period to June 2014 remains fractionally below zero.
- 5.4 The **Tracking Error** figure reflects how closely a fund manager's actual return follows their respective benchmark. As at June 2014 the figure was 3.3%.
- 5.5 The **Information Ratio** is a measure of excess returns in relation to the benchmark and the consistency of those returns. A high IR could be derived from a high portfolio return, a low benchmark return and a low tracking error. For the period to June 2014 the ratio for the Fund was +0.4%.
- 5.6 Steps taken by the PFC to diversify into Property and Diversified Growth Funds have clearly had a positive impact on these four measures. Volatility has reduced, and risk adjusted returns have improved.

6.0 SOLVENCY

- 6.1 The **solvency position** is presented in **Appendices 3 and 4**. As at 30 June 2014 the estimated solvency remained unchanged from the March 2014 figure of 84%.
- 6.2 The assets of the Fund increased by 1.3% in the Quarter, whilst liabilities (as modelled by the Actuary) rose by 1.4%.
- 6.3 The relative position, over time, between liabilities and assets is shown very clearly in **Appendix 4** which is a simple graph using data from **Appendix 3**

7.0 REBALANCING

- 7.1 During the quarter £20m was transferred from cash into the property investment with Legal & General. £21m was transferred from Fidelity to the property investment with Newton. £63m was transferred from Standard Life to M&G Investments.

8.0 PROXY VOTING

- 8.1 The report from PIRC is available on request summarising the proxy voting activity in the period April to June 2014. This report covers the votes cast on behalf of NYPF at all relevant company AGMs in the period and includes an analysis of voting recommendations at selected meetings and responses to company engagement.

10.0 RECOMMENDATION

10.1 Members are asked to note the investment performance of the Fund for the Quarter ending 30 June 2014.

Executive Summary

Market Review

Market Briefing - Quarter Ended 30 June 2014

Market Summary

During the second quarter of 2014, returns were primarily positive, the only exception being Overseas Bonds. Property provided the strongest result of the quarter, followed by Overseas Equities and UK Equities.

UK Equities

During the Quarter the FTSE 100 was the best performing sector with a return of 3.2%, followed by the FTSE 350 with a return of 2.3%. The FTSE 250 was the only sector with a negative performance, returning -2.4%.

Over the one year period ending 30th June 2014, all the indices achieved positive returns. The FTSE Small CAP was the best performing sector with a return of 19.1% over this period. The FTSE 100 was the weakest performing index with a return of 12.3%.

Health Care was the best performing industry sector with a return of 10.5% for the Quarter. The weakest performing sector was Technology with a return of -7.5%.

Over the one year period ending on 30th June 2014, returns ranged from 26.2% for Health Care to 7.3% for Financials. Basic Materials was the second best performing sector with a return of 17.8%.

Overseas Equities

The Second Quarter of 2014 saw primarily positive results across the Overseas Equity market. Within Europe, returns were mixed and Norway was the best performing country with a return of 5.9%. This was followed by Spain and Denmark with returns of 4.5% and 2.4% respectively. Greece was the weakest performing country with a return of -16.5%, followed by Ireland with a return of -12.1%. Over the one year period Greece was the strongest performing country with a return of 45.2%, with Austria being the weakest with a return of 6.9%.

Outside Europe, Taiwan was the best performing country with a return of 8.0%. Canada provided the second best performance with a return of 7.0%. The weakest performing country was Australia with a return of 0.3% in sterling terms.

Executive Summary

Market Review

UK Bonds

Returns were positive across most of the UK Bond sectors during the Quarter. For the eighth quarter running, UK Non-Gilts outperformed Gilts with a return of 2.1% compared to 1.1%. Within Gilts, long-dated Gilts were the strongest performing sector with a return of 2.3%. Short-dated Gilts were the weakest performing sector with a return of 0.0%.

Over the one year period ending 30th June 2014, UK Non-Gilts were once again the best performing sector with a return of 6.9% compared to a return of 2.3% for UK Gilts. Within Gilts, long-dated Gilts provided the strongest performance with a return of 5.3%, whilst the weakest came from short-dated Gilts with 0.1%.

Overseas Bonds

The second Quarter of 2014 saw Overseas Bonds record a negative performance of -0.4%. Within Europe, Italy was the best performing country with a return of 0.3%. Sweden was the weakest performing country with a return of -2.8%. Outside Europe, Australia was the best performing country with a return of 3.0%, whereas US was the weakest performing country with a return of -0.9%.

Over the twelve month period, Overseas Bonds achieved a return of -6.1%. European Bonds saw mixed returns over this period, with Spain providing the strongest return of 8.2%, and Sweden recording the weakest result with a return of -5.6%. Outside of Europe, the best performance came from Australia with a return of -3.6%. Japan was the weakest performing country with a return of -10.2 %.

UK Index-Linked Gilts

UK Index Linked-Gilts achieved a positive return of 1.0% for the second Quarter of 2014. Within this sector, long-dated Index-Linked Gilts provided the strongest performance with a return of 1.4%, whereas the weakest performance was provided by short-dated Index-Linked Gilts with a return of -0.3%.

Over the one year period to 30th June 2014, on an overall basis UK Index-Linked Gilts achieved a return of 3.9%. Over the same period, long-dated Index-Linked Gilts were the strongest performing sector with a return of 5.3%, whereas short-dated Index Linked Gilts showed the weakest performance, returning 0.4%.

UK Cash and Property

Property recorded a positive return for the sixth successive quarter with a return of 4.1%. The overall return for the year ending on 30th June 2014 was 13.0%. Cash achieved a return of 0.1% over the Quarter and 0.4% over the last twelve months.

Fund Performance, Risk and Allocation Highlights

During the Second Quarter of 2014, the fund returned 0.55% versus its benchmark of 1.10%, thereby underperforming by 0.55%. In terms of longer period performance, the fund has outperformed over 5 year by 1.46%.

At asset class level, the fund underperformed its blended benchmark in all the majority of asset classes. UK equities is the worst performing sector which underperformed its benchmark by 2.55%. Property and Alternatives however outperformed the benchmark by 2.78% and 1.10% respectively.

Over the quarter, eight accounts out-performed their benchmarks. The best (excluding the Cash Account) was shown by Threadneedle who out-performed their benchmark of UK Retail Price Index (RPI) by 4.68%.

For asset allocation the fund is closely matched to the benchmark with the largest variances being in Alternatives and Bonds where the fund is 3.09% underweight and 2.40% overweight respectively.

Appendix - Glossary

Risk

Standard Deviation - Standard Deviation measures the variability (or volatility) of a fund's return over a specified time period.

Tracking Error - Tracking Error measures the variability of a fund's returns relative to its benchmark over a time period.

Information Ratio - Information Ratio is a measure of performance adjusted for the level of (active) risk.

Sharpe Ratio - Sharpe Ratio relates a portfolio's reward (determined as the portfolio's return minus risk free return) to the portfolio's variability (as measured by its standard deviation).

Active Number of months - Number of complete months of performance

Number of Positive Months - number of complete months the portfolio has produced a positive return

Consistency Rate (%) - Number of Positive Months/Active Number of Months

Benchmark Consistency (%) - Number of Positive Benchmark Months/Active Number of Months

Outperformance (%) - Percentage of months the portfolio has outperformed the benchmark

Attribution

Allocation Effect - Measures the impact of decisions to allocate assets differently from the benchmark.

Selection Effect - Measures the impact of decisions of selecting securities different from those held in the benchmark.

Currency Effect - Measures the impact of deviating from the benchmark currency position.

Management Effect - Measures the combined impact of allocation, selection and currency effects. At the total level, this represents the fund's relative performance against the benchmark.

Interaction Effect - Measures the combined impact of an investment manager's selection and allocation decisions within a segment.
