5.0 RISK INDICATORS

- 5.1 The Report (**pages 10 and 11**) includes three long-term risk indicators.

- 5.2 The Fund's annualised **Standard Deviation**, which is a reflection of volatility, was 7.7% for the rolling three year period to March 2016, 1.3% above the benchmark.
- 5.3 The **Sharpe Ratio** is a measure of how well the return compensates an investor relative to the risk taken. A higher Sharpe Ratio reflects a better return for a given level of risk or lower risk for a given level of return. The ratio for the Fund for the rolling three year period to March 2016 is +0.1% above the benchmark.
- 5.4 The **Tracking Error** figure reflects how closely a fund manager's actual return follows their respective benchmark. As at March 2016 the figure was 2.3%.
- 5.5 The **Information Ratio** is a measure of excess returns in relation to the benchmark and the consistency of those returns. A high IR could be derived from a high portfolio return, a low benchmark return and a low tracking error. For the period up to March 2016 the ratio for the Fund was +0.9%.

6.0 SOLVENCY

- 6.1 The **solvency position** is presented in **Appendices 3 and 4**. As at 31 March 2016 the estimated solvency was 72%. This is a 6% decrease from the solvency figure as at 31 December 2015 and is also a decrease of 1% to the 2013 Actuarial Valuation figure.
- 6.2 Asset outperformance since the 2013 Actuarial Valuation has been 9.3% p.a., however due to falling gilt yield values the solvency has actually decreased by 1% over the three years.
- 6.3 The liability valuation has been carried out on a basis consistent with that used for the 2013 Triennial Valuation. The Fund's actuary, Aon Hewitt will use a different methodology for the 2016 Valuation, where the discount factor will be based on the Fund's assets and not on gilt yields. Going forward, it is expected that this approach will reduce the significant volatility the Fund has experienced in liability valuations from quarter to quarter.

7.0 REBALANCING

- 7.1 No rebalancing has taken place since the end of the December 2016 quarter.

8.0 PROXY VOTING

- 8.1 The report from PIRC is available on request summarising the proxy voting activity in the period January 2016 to March 2016. This report covers the votes cast on behalf of NYPF at all relevant company AGMs in the period and includes an analysis of voting recommendations at selected meetings and responses to company engagement.

9.0 RECOMMENDATION

- 9.1 Members are asked to note the investment performance of the Fund for the Quarter ending 31 March 2016.
