NORTH YORKSHIRE COUNTY COUNCIL

BUSINESS AND ENVIRONMENTAL SERVICES

TRANSPORT, ECONOMY AND ENVIRONMENT OVERVIEW AND SCRUTINY COMMITTEE

22 JANUARY 2014

RINGWAY PERFORMANCE - 2013/14 (APRIL - SEPTEMBER)

Report of the Corporate Director – Business and Environmental Services

1.0 PURPOSE OF REPORT

1.1 The purpose of this report is to advise Members of Ringway's performance under the Highways Maintenance Contract (HMC) 2012 during the period 1 April 2013 – 30 September 2013.

2.0 BACKGROUND

Contract Award

2.1 HMC 2012 was awarded to Ringway Infrastructure Services Ltd (Ringway) in November 2011 and commenced on 1 April 2012. The contract was awarded for 10 years, the maximum period allowable under the terms of the procurement. The minimum contract period is 6 years.

Scope

2.2 HMC 2012 covers the provision of all aspects of the highways service including highway and bridge maintenance and improvement works, surface dressing, emergency provision, gully emptying, grass cutting, winter maintenance, fleet maintenance and street lighting maintenance. Under the contract there are financial exclusivity limits above which the Council may tender individual maintenance and improvement works. However, the Council may also offer works above the exclusivity limits to Ringway if value for money can be demonstrated.

Contract Performance Mechanism

- 2.3 The maximum term of the Contract is 10 years, the minimum term is 6 years. The contract has a 'Claw Back' and a 'Win Back' mechanism, whereby any years clawed back for poor performance can subsequently be won back for good performance.
- 2.4 Under the terms of the Contract there is provision to assess Ringway's performance against a series of Contract Performance Indicators (CPIs) identified in the contract. Each of the CPIs has a set target for the current year and for the following 2 years. The target for each third year will be set by the County Council in consultation with Ringway as part of the completion of the Annual Performance Review (Evaluation Panel) each May. The CPIs comprise Primary Performance Indicators (PPIs) and Secondary Performance Indicators (SPIs). The key indicators are the PPIs; the SPIs are used to provide additional evidence of the contractor's performance.

- 2.5 Ringway's performance, when measured against the set targets for each of the CPIs, informs whether the contract period should be reduced, stay the same or if applicable be increased. In Year 1 (2012 2013) of the Contract the only CPI that could have reduced the contract period was the PPI for Winter Maintenance.
- 2.6 After Year 1 of the Contract, all PPIs then come into force regarding the 'Claw Back' and 'Win Back' mechanism highlighted in paragraph 2.3 above. Any years lost as a result of failing to achieve a prescribed number of prioritised PPIs, can subsequently be won back by achieving the associated rolling 3rd year target(s) a year early.
- 2.7 In every year of the contract, including Year 1, there is a requirement for the contractor to have to submit a Rectification Action Plan (RAP) for each CPI that fails to meet the required target. Each RAP details how the levels of performance are to be increased to achieve the required rolling 3rd year target for that CPI, a year early.

Evaluation Panel - 22 May 2013

- The first Evaluation Panel was held on 22 May 2013. Chaired by the Corporate Director (BES), the Key Decision to retain the full 10 years of the contract (at that point in time) was taken. In addition, future CPI targets were agreed, together with the requirement to monitor and manage Ringway's RAPs and Annual Action Plan through the contract Governance arrangements.
- 2.9 A full assessment of Ringway's performance in Year 1 of the contract was carried out and is summarised in Appendix A, which covers Ringway's performance over the period 1 April 2012 to 31 March 2013.
- 2.10 At the Evaluation Panel in May 2013, it was also agreed that a future review meeting would be arranged around November 2013, including the Chairman of the Transport, Economy and Environment Overview and Scrutiny Committee (TEE OSC) and the BES Executive Members.
- 2.11 Ringway's performance over the first two quarters of 2013/14 (1 April 2013 to 30 September 2013) is summarised in Appendix B. Appendix C provides some commentary against each of the individual CPIs for the first two quarters of 2013/14.

Previous meetings

- 2.12 Members discussed Ringway's performance at the meeting of the TEE OSC on 23 January 2013 and requested that Ringway attend a future TEE OSC.
- 2.13 Following the TEE OSC of 23 January 2013, BES Executive Members discussed Ringway's performance with the Assistant Director (Highways and Transportation) and senior Ringway Managers on 25 March 2013. Discussions centred on Ringway's performance and improvement actions, particularly relating to 'customer facing' aspects of the contract and ICT/finance system and process issues, but also included Client improvements regarding works ordering.

- 2.14 Ringway attended the TEE OSC of 17 July 2013 where there was lengthy discussion on Ringway's performance during 2012/13 and the outcome of the first Evaluation Panel. In addition, Members resolved to receive an annual report on performance against the Rectification Action Plans with interim reports as and when there was further information to report, including feedback from the annual Evaluation Panel.
- 2.15 As agreed at the Evaluation Panel, a future review meeting was arranged and held on 27 November 2013, including the Chairman of the TEE OSC and the BES Executive Members. At this meeting the HMC2012 Performance Review meeting of 27 November 2013, Ringway's performance was again scrutinised and challenged. It was noted that:
 - whilst performance against the SPIs had reduced during Q1 and Q2 of 2013/14, performance against the PPIs had improved
 - Ringway's projected performance for Q3 and Q4 is significantly better than the actual performance for Q1 and Q2, for a number of reasons including a further change in management in the Spring of 2013 with a consequent focus on performance
 - the data reported by Ringway for several CPIs is under specific challenge eg urban grass cutting and road markings
 - a number of CPIs are measured either at the end of the year, or in the case of the winter maintenance PPI, during Q3 and Q4
 - several CPIs, particularly those associated with Streetworks Noticing and Sustainability, have been jointly redefined following various improvement meetings and Workshops
 - Ringway acknowledged that their level of performance during Q1 and Q2 was unacceptable, but pointed to recent signs of significant performance improvement.
 - Officers stated that if the current performance was taken as the year end performance, then they would be recommending to the May 2014 Evaluation Panel the loss of a year from the Contract Term.
- 2.16 During the above meeting, there was also lengthy discussion around the need to improve the provision of information to Members and it was felt that Ringway could help develop a Member Communication Strategy. This strategy would look to deliver the Client's long standing request to provide weekly works updates to Members showing where the gangs were working. Other initiatives could include a Member Seminar, attendance at Member Surgeries and also the development of an online 'Members Portal' to provide round the clock access to highway information.

3.0 CONSIDERATION

- 3.1 Ringway's performance is scrutinised throughout the year at the monthly Operational Management Group (OMG), quarterly Strategic Management Group (SMG) and 6 monthly Partnering Steering Group (PSG) meetings as part of the HMC 2012 Governance arrangements.
- 3.2 A summary of the progress made against each of the RAPs is contained in Appendix D Ringway's Rectification Action Plan Tracker and projections of future performance against those CPIs that are failing are provided in Appendix E and Appendix F.

3.3 A summary of the improved PPI performance between 2012/13 and 2013/14 is provided in Appendix G with evidence of improvements made in the use of PDAs to support PPIs provided in Appendix H.

3.4 Appendix I consists of a report recently produced by RIS which highlights further recent improvements and proposals that RIS are to discuss with NYCC

with regards to Member communications (see 2.17 above).

3.5 Whilst this report concentrates on Ringway's performance during the first two quarters of 2013/14, it is felt that the current management team are making progress with a number of key initiatives such as the Operations Hub and system improvements.

4.0 LEGAL IMPLICATIONS

4.1 Following the Annual Review of HMC 2012, the associated Key Decision was published on the County Council's Statutory Forward Plan in accordance with

its Constitution.

5.0 EQUALITIES IMPACT ASSESSMENT

5.1 Consideration was given to equality and diversity issues in the recommendation presented at the Evaluation Panel and it was the view of Officers that the recommendation had no impact on any of the protected

characteristics identified in the Equalities Act 2010.

5.2 An EIA for HMC 2012 has been jointly developed with Ringway during the

mobilisation process and is reviewed annually.

6.0 FINANCE IMPLICATIONS

6.1 In the first year of HMC 2012, approximately £43million was spent.

7.0 RECOMMENDATION

7.1 It is recommended that Members:

i) note the contents of this report and attached Appendices.

Appendix C - Ringway Performance 2013/14 Apr - Sep (with individual CPI commentary)

Primary Pe	rformance Indicators			
Reference	Description	2013/14 Target	Performance to Date (Apr-Sep)	Comments
PPI WM01	Operational Performance - Winter Gritting Routes	Various	No score yet as winter	maintenance PPI measured Oct - March
PPI S01	Start on Time	85%	91.18%	Performance now above target on a PPI which failed in 2012/13. 101 schemes started.
PPI S02	Finish on Time	75%	83.81%	Performance above target. 69 schemes completed.
PPI S03	Defects - Impact at Handover	75%	98.10%	Performance above target. 2 schemes handed over were not defect free.
PPI S04	Streetworks Noticing	Various	October 2013, as full da PPIs have been agreed October 2013. The CPI	PIs were jointly reviewed at a Workshop on 10 th ata was not being reported. The revised Interimed and will be reported with effect from 1 st I Definition Document will be updated and hal Management Group.
PPI S05	Schemes in Gain	35%	43.14%	
PPI S06	Value of Gain Achieved	To achieve break even/no pain to NYCC, or schemes in gain from end of year 2	£114,246.28	Performance at end Q2 shows above target, the further calculation of Pain/Gain has currently been put on hold pending a review of Scheme Sign Off Forms.
PPI RM01	Achievement of Programme - Grass Cutting Urban	95.5%	97.26%*	Whilst reported data shows as above target, the data is currently being validated by area office staff.

Reference	Description	2013/14 Target	Performance to Date (Apr-Sep)	Comments
PPI RM02	Achievement of Programme - Grass Cutting Rural	95.5%	100.00%	Performance above target
PPI RM03	Achievement of Programme - Weed Spraying	95.5%	100.00%	Performance above target
PPI RM04	Achievement of Programme – Gully Emptying	95.5%	59.36%	Performance is below target and unlikely to meet the required performance at year end in line with the criteria defined within the Definitions Document. RIS, however, confirm that all gullies will be been cleaned to the agreed frequency within the year.
PPI RM05	Road Markings	75%	89.02% *	Whilst reported data for completion of road marking schemes shows above target, data is currently being validated following challenge
PPI RM06	Achievement of Programme - Surface Dressing	96%	100.00%	Performance above target and passed for the year, on a PPI which failed in 2012/13
PPI RM07	Defects	226	46	Performance above target (ie less defects than max permitted to date)
PPI RM08	Highway Dangerous Defects CAT 1 (E24)	100%	85.86%	Performance below target based on initial PPI approach. On-going actions being
PPI RM09	Completion on Time – Emergency Call Outs (E1)	100%	72.00%	undertaken to improve consistency of Client ordering and use of PDAs by Ringway, which skew figures. Please see Appendix H
PPI RM10	Productivity of GMUs (Planned) Weekly	92%	68.47%	demonstrating improvement of the use of PDA's through improvements of the Hub development. Confidence is high on significant improvements over the next 6 months
PPI HS01	Accident Frequency Rate	0.50	0.70	Performance below target. 3 RIDDOR accidents to end Q2 2013/14. Subject to no further reportable incidents, as this target is based on a rolling 12 months, RIS anticipate the AFR at the end of March 2014 to fall below the target.

PPI FM01	Compliance with Servicing Schedule	81%	95.93%	Performance above target
PPI FM02	MOT Pass Rate	96%	97.50%	Performance now above target, on a PPI which failed in 2012/13
PPI SL01	Street Lighting Fault Repair	95.5%	96.51%	Performance above target
PPI SL02	Achievement of Programme - Street Lighting Cyclical Maintenance	9 working days	5.35	Performance above target
PPI WFM01	Value for Money	To demonstrate VfM	To be calculated at yea	r end based on benchmarking exercises

Secondary Performance Indicators

Reference	Description	2013/14 Target	Performance to Date (Apr-Sep)	Comments
SPI PCS01	Public Satisfaction – Schemes (excl street lighting)	90%	92.42%	Performance above target. 393 cards issued, with 84 returned at end Q2.
SPI PCS02	Public Satisfaction – Street Lighting Schemes	80%	94.44%	Performance above target
SPI PCS03	Public Compliments – All Services	65	24	Performance below target, on a straight line projection
SPI PCS04	Public Complaints up held against RIS – All Services	14	0	Whilst reported performance shows above target, a data validation exercise is being undertaken regarding historic complaints
SPI PCS05	Annual Client Survey	66%	No score yet, as the Cli April 2014.	ient Survey will be undertaken end March/early
SPI PCS06	Client Satisfaction – GMU	85%	84.35%	Performance marginally below target
SPI PCS07	Client Satisfaction – Gully Emptying	85%	82.27%	Performance just below target
SPI PCS08	Client Satisfaction – Road Marking	85%	68.60%	Performance below target
SPI PCS09	Client Satisfaction – Winter Maintenance	92%	97.40%	Performance above target (note based on Client comments April 2013)
SPI PCS10	Client Satisfaction – Grass Cutting Urban	85%	65.56%	Performance below target

Reference	Description	2013/14 Target	Performance to Date (Apr-Sep)	Comments
SPI PCS11	Client Satisfaction – Grass Cutting Rural	85%	86.83%	Performance above target
SPI PCS12	Client Satisfaction – Fleet	85%	95.16%	Performance above target, informed by Driver Questionnaires etc
SPI PCS13	Client Satisfaction – Schemes [incl. street lighting]	85%	72.25%	Performance below target, but based on low nos. Client returns end Q2
SPI PCS14	Client Satisfaction – Street Lighting Maintenance	85%	81.60%	Performance just below target
SPI AAP01	Contractor Progress against Annual Action Plan – self evaluation	85%	restructure, to reflect hi	ritten by Ringway during 2013/14 following NY Business Plan priorities. Quarterly reporting at Strategic Management Group.
SPI S01	6:4:2 Compliance	85%	68.32%	Performance below target on Schemes which meet both the '4' & '2' elements ie agreement of Target Cost (4) & H & S Plan (2)
SPI HS01	Number of Service Strikes	14	8	Performance currently below max no. service strikes permitted
SPI HS02	RIDDOR	3	3	Performance currently not exceeding max no. RIDDOR accidents permitted
SPI SUS01	Carbon Reduction Measures	536.10	a review of the 2012/13	Sustainability SPI have been agreed following baseline figure and also clarification of the two
		CPI – A (161.316)	consumed) and CPI -	d. CPI – A (Energy, waste and material B (Energy only). The revised CPIs will be n 1 st April 2013 and enable reporting against
		CPI – B (75.300)	other Ringway contract	as well as also being able to benchmark against s. The CPI Definition Document will be via Operational Management Group.

Appendix E – Failing PPI's projected Improvement

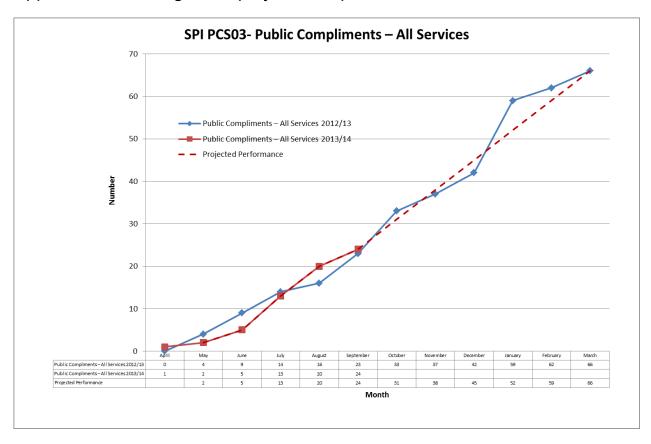

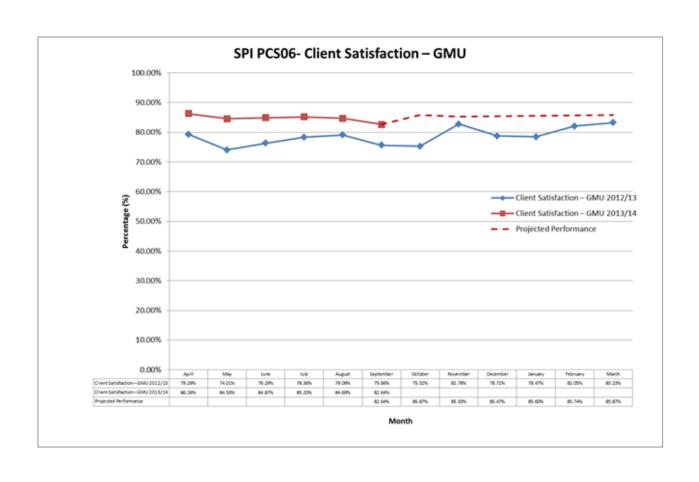

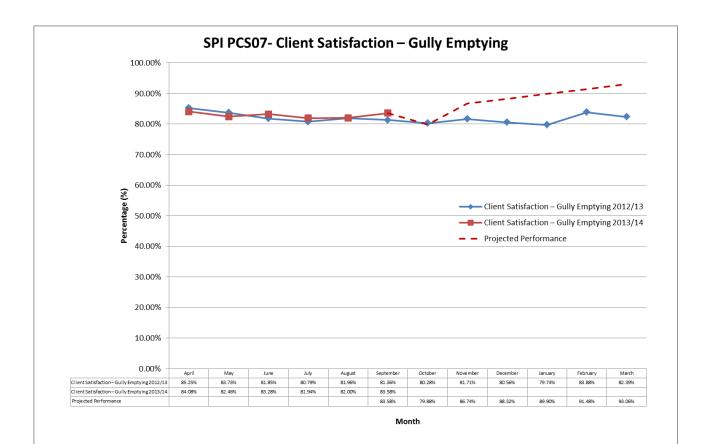

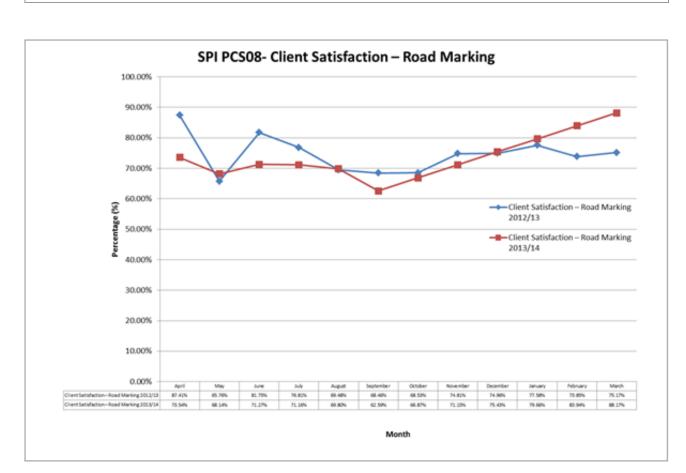

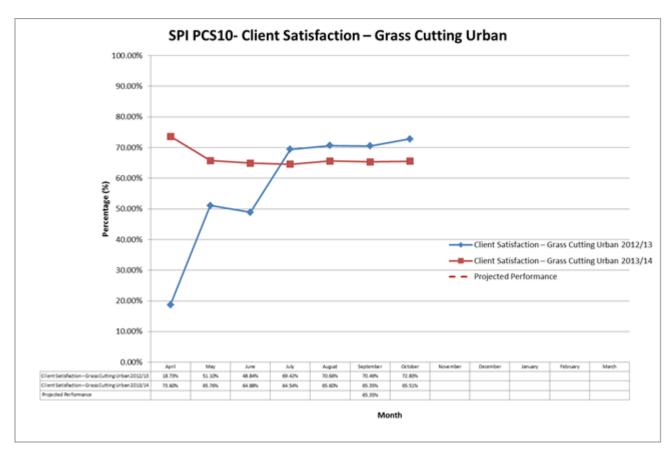

Appendix F – Failing SPI's projected Improvement

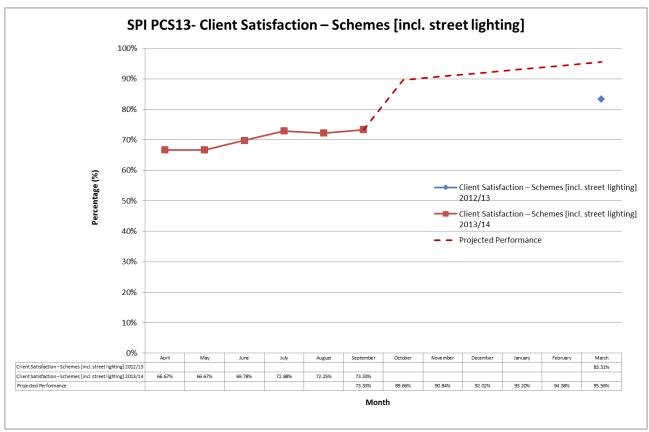

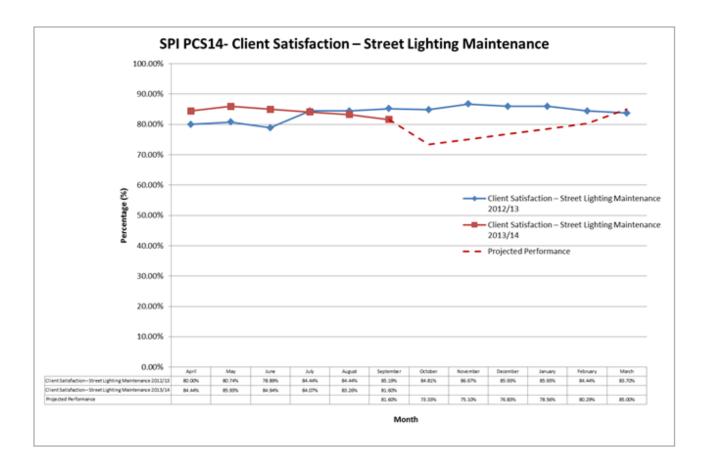

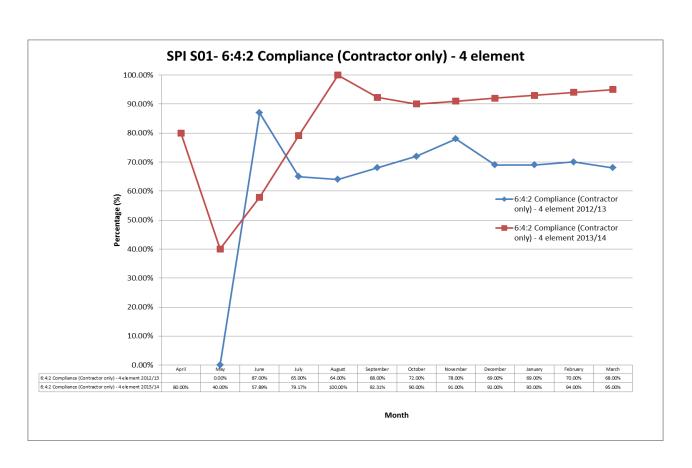

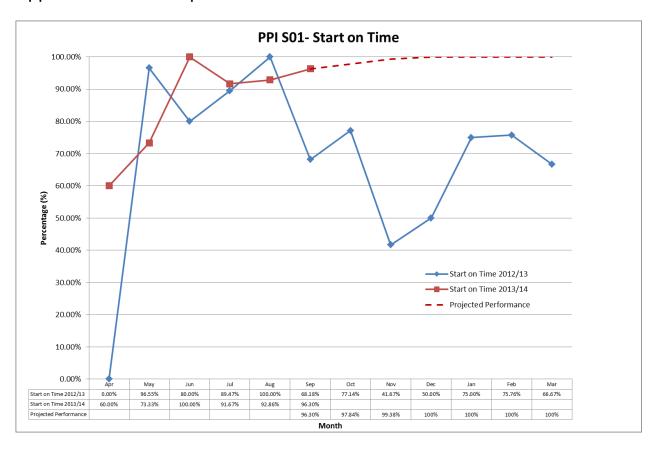

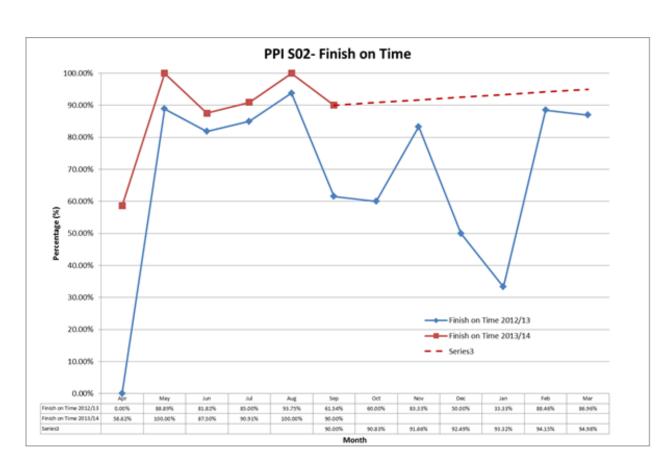

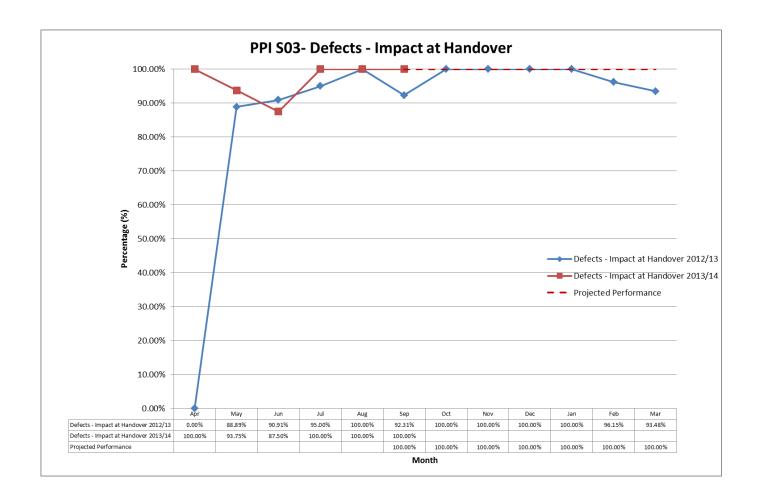

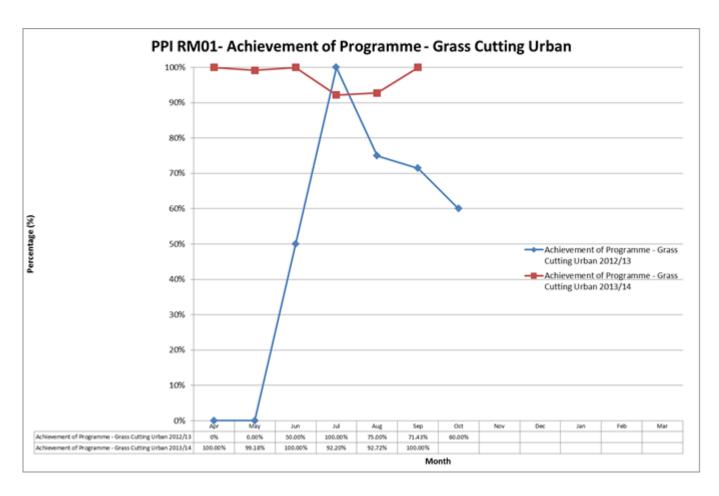

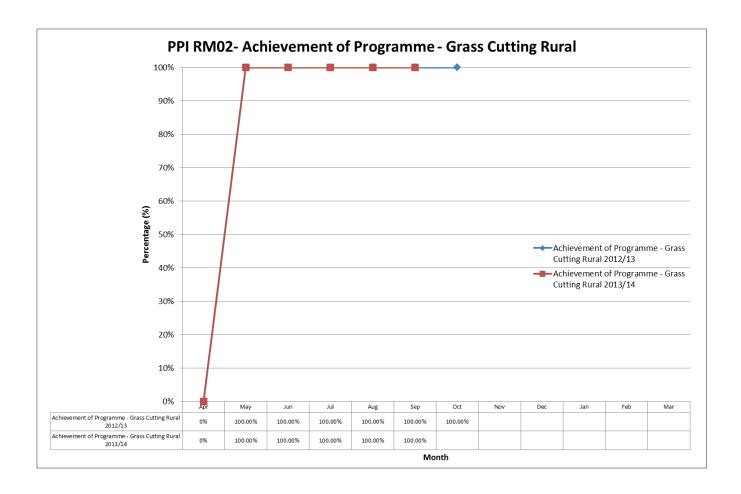

Appendix G - PPI Improvements between 2012/13 and 2013/14

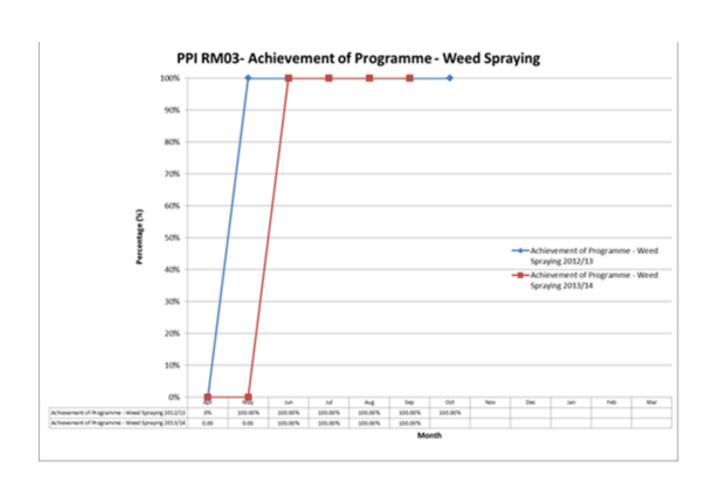

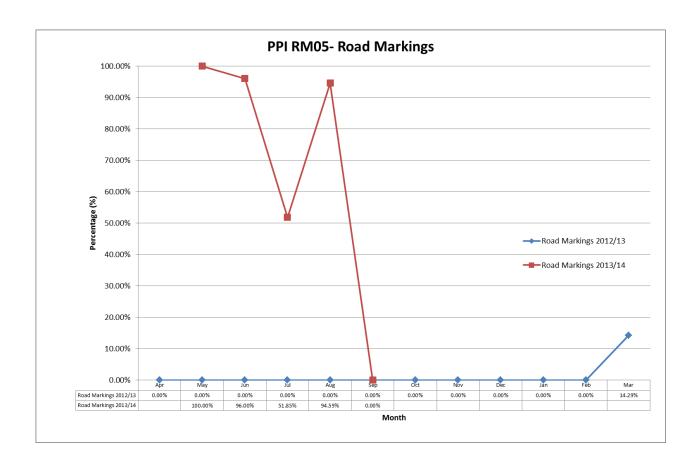

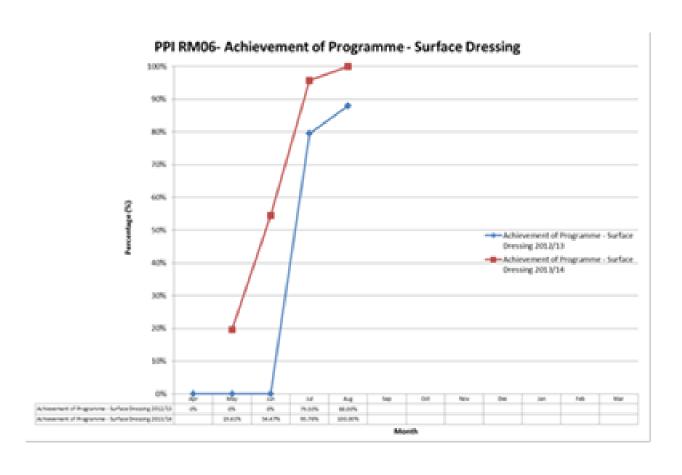

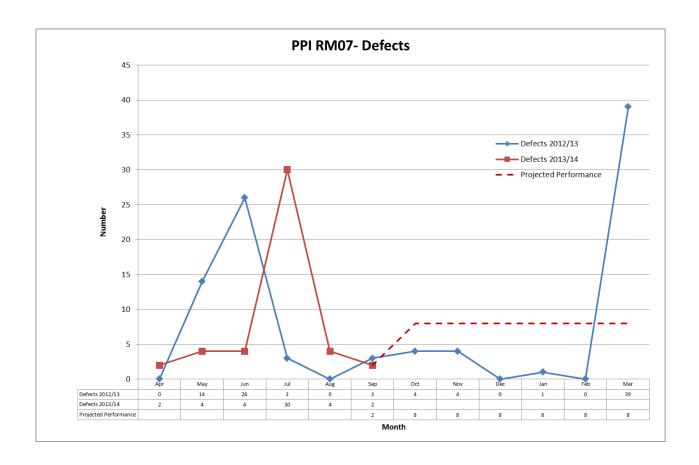

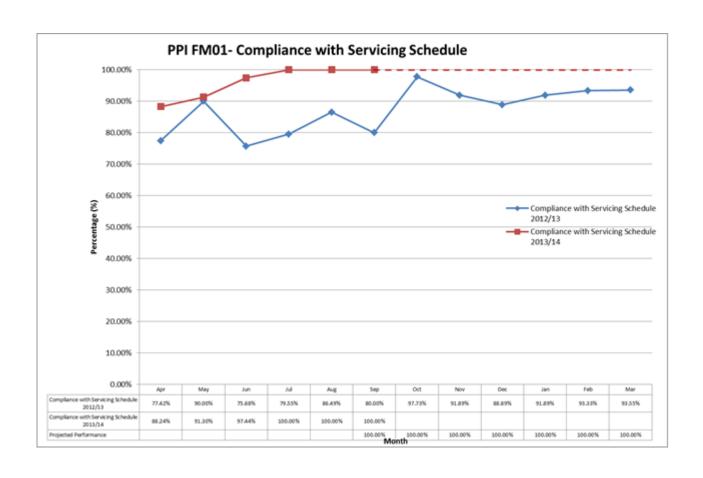

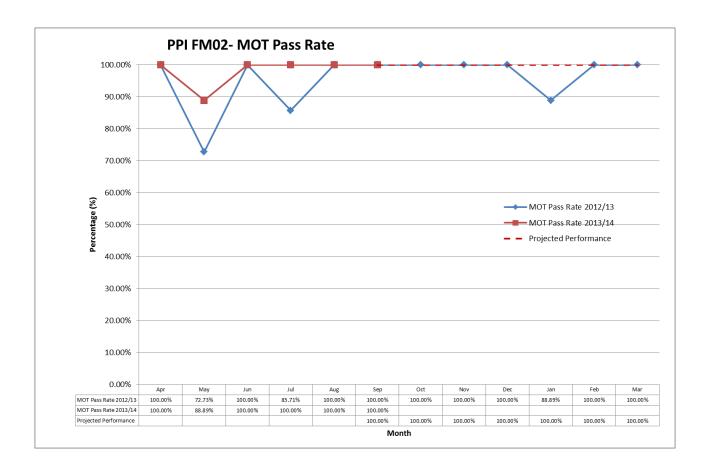

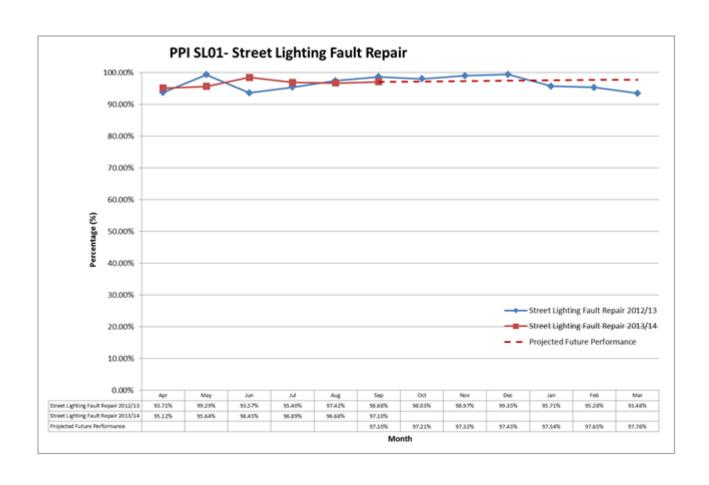

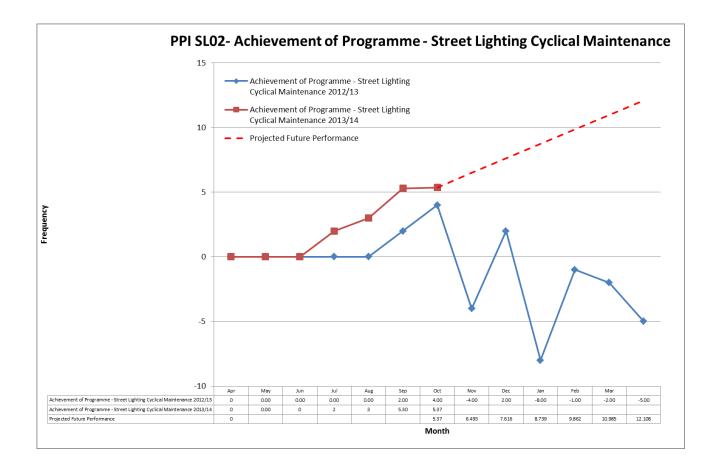

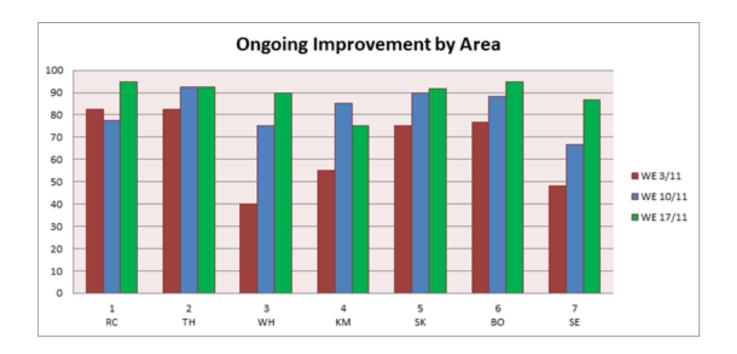

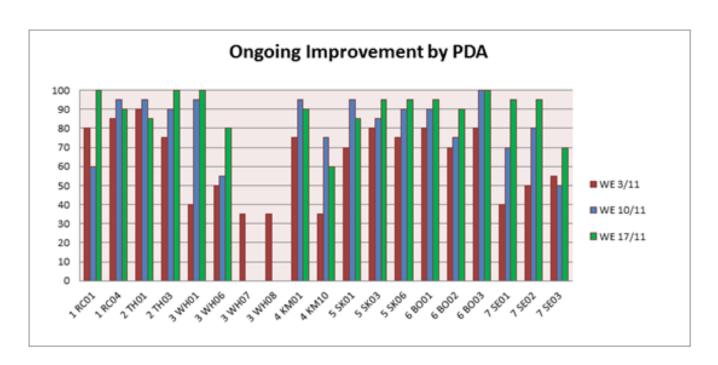

Appendix H – PDA Improvement

Appendix I – Proposed Member Communications

Overview

This document details what Ringway North Yorkshire can offer to assist in communicating effectively to Members and other key stakeholders.

All information would be controlled through a communication Plan agreed between North Yorkshire and Ringway. The Ops Hub would produce the information to the frequencies agreed with a nominated owner of the process and data within Ringway to oversee the Ops Hub.

All of the information is currently generated through Ringway scheduling, programming, undertaking works and recording within the eServe MIS. The proposal is based on our experience in other contracts.

Interface Options

1. Use existing client Website.

The existing North Yorkshire website could be used to include a Members Portal, with secure login, to store information for communication to Members. Ringway could submit this information to the authorised owners of each section of the website. North Yorkshire SharePoint environment, if public facing, could also be used. http://www.northyorks.gov.uk/resident

2. Use secure login pages to www.ringway.co.uk website

Use the new Ringway website which is going live in January 2014. This will allow specific page to be set up for North Yorkshire members with their own usernames and passwords. Control of the site would remain with Ringway employees and could not be updated by North Yorkshire employees. We have created Members Portals for our Hounslow Highways and Island Roads PFI Contracts.

3. Use new specific highways North Yorkshire web pages.

An individual hNY domain and website could be bought and purchased for communication internally to all partners as well as to key stakeholders such as Members. The site could have a holding page for general information and then secure username and password for access to separate sections. This does bring an administrative burden on the Partnership to maintain the website.

Content Options

Each of the content options below can be generated for Members and key stakeholders and published through various formats to the various interface options detailed.

Consideration must always be given as to what we are communicating and in particular personal details and scheduled dates which may be changed due to weather. Our sister company, RingwayJacobs, has spent a lot of time working with Essex County Council defining clearly what information is communicated on their Essex website and ensuring that a controlled version of jobs information is communicated.

Jobs

- Job Status Reports by Contract Code Type. Total numbers per job type against the various status.
- Works done in my area in past 2 weeks.

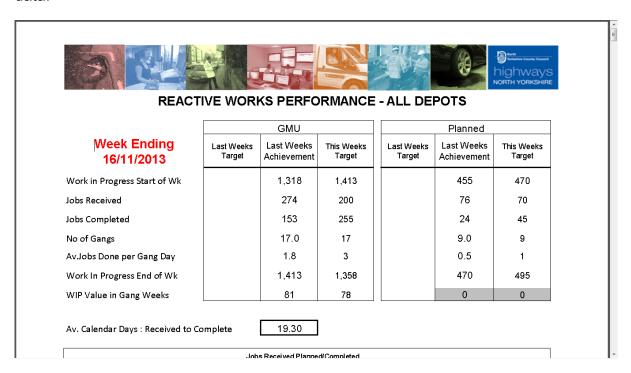

This is job information, with coordinates, which is pulled from CPA through our standard reporting tools. It can be published to a mapping interface on the website as points, via MS Excel which can be interrogated, pdf, MS Word or through a Microsoft Sharepoint type list

if held on ePI hNY. This information can be broken down to locations, districts or Areas. The information is also available to the Authority through their Symology tool as job updates are given from eServe within the Ringway environment back to Symology when the status is updated. These jobs could include planned and GMU works.

2. Performance and Utilisation Reporting:

- GMU Report per area
- Planned Works per Area

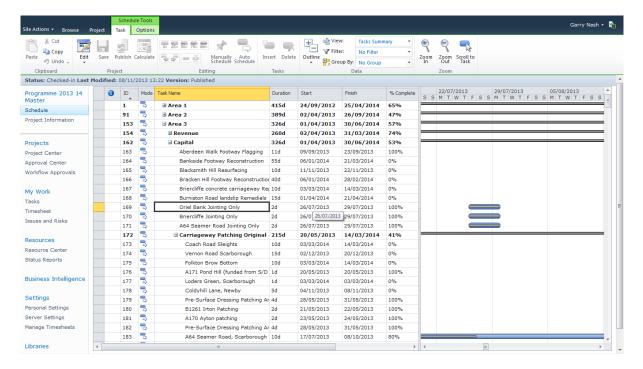

This is number of jobs completed by GMU or planned works category per area. It will show no. of jobs completed against the different priorities instructed. It is based on depot poster data.

3. Post Code Look Up - Programmes

- Post Code Look Up for Schemes 2 Year Programme
- Post Code Look up for Programmed Works Sean Close Programme
- Post Code Look up for Routine and Cyclical Works.

All programmed information is held within MS project Server and communicated through ePI. This allows us to control and communicate more effectively programming information to Ringway and North Yorkshire Officers.

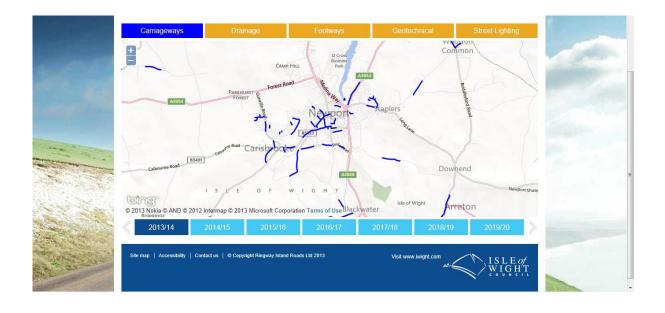

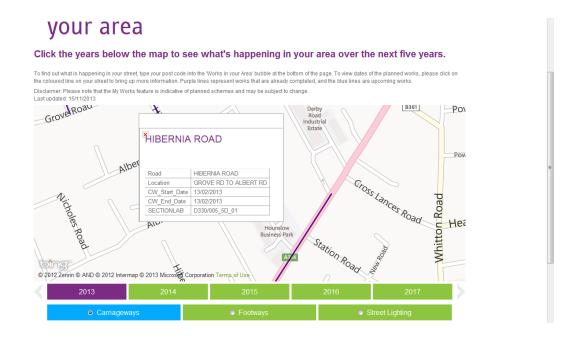

Through our experience on the PFI's, we have developed "Post Code Look Up" tools to communicate our programmes more effectively to members of the public. This allows us to take our programmed information and then upload periodically to the Post Code Look Up tool on the website. The tool could be visible to members only or it could be put on any of the public facing websites. There is a cost involved to generate this tool for North Yorkshire but Ringway have already invested substantial amounts in the tool which North Yorkshire could get the benefits so the costs are less than they would have been.

This process requires an owner to publish the information periodically as agreed in the Communication Plan. It also requires GiS expertise within the organise to render the programme information in a map format.

4. Works Scheduled

Elgin Report

This information is already communicated on the North Yorkshire website. It shows all scheduled works up to 3 months ahead. It includes not just hNY works but also other utility works. It should also include items should as skip and scaffold licences going forward.

5. CPI"s, Assets Refreshed and Resources Used

The authority could, using their Symology tool, give quantities and type of assets updated. Ringway could provide this information by using the Schedule of rate quantities as the basis for quantity and type of works and assets renewed or refurbished.

Information on number of crews with plant, equipment and materials used by Area could be published to show what resources each member has been assigned to maintain their environment.

Primary and Secondary CPI reports/ dashboards could be populated on the Members Portal to give visibility to performance of the contract.
