Where the Committee refused planning permission the reasons for that decision are as shown in the report.

The Principal Development Management Officer drew Members attention to two updates since the publication of the Committee agenda pack on the 4 June 2024. This was on the basis that the Flood Risk Assessment contained insufficient information to adequately assess the potential flood risk posed by the development, to include not stating the design flood level.

The second update was regarding the officer recommendation within the Committee report; following advice received from the Senior Lawyer to the Committee, the recommendation had been amended to read as follows:-

Members are MINDED TO GRANT planning permission subject to the conditions proposed, completion of a S106 agreement with terms as detailed in Table 1; and the satisfactory resolution of any outstanding concerns from the Environment Agency, to include any additional conditions necessary to address their concerns, and that determination of the application be delegated to the Assistant Director for Planning – Community Development

- The timescale, if any, for the replacement of the solar panels.
- Members commended the planning case officer on a comprehensive Committee report.
