

Initial Climate Change Impact Assessment (Form created August 2021)

The intention of this document is to help the council to gain an initial understanding of the impact of a project or decision on the environment. This document should be completed in consultation with the supporting guidance. Dependent on this initial assessment you may need to go on to complete a full Climate Change Impact Assessment. The final document will be published as part of the decision-making process.

If you have any additional queries, which are not covered by the guidance please email climatechange@northyorks.gov.uk

Title of proposal	Clinical Practitioner Service Offer – Psychologically Informed Partnership Approach
Brief description of proposal	<p>This service is made up of two strands. The first strand aims to provide a flexible, proactive, creative and accessible psychological service for children, young people and their families. The second strand of the service supports the council's Children and Young People's Services (CYPS) team to embed psychological approaches to practice, through bespoke training, consultation and joint working. This will include supporting the development of systemic practice through consultation, formulation and joint working and developing reflective approaches to practice throughout the organisation in partnership with North Yorkshire Council staff, managers and senior leaders.</p> <p>The service contributes to a psychologically informed partnership approach to meeting the needs of looked after children, those who are in need or on the edge of care.</p>
Directorate	CYPS
Service area	Children and Young People's Service
Lead officer	Emma Hopper
Names and roles of other people involved in carrying out the impact assessment	

The chart below contains the main environmental factors to consider in your initial assessment – choose the appropriate option from the drop-down list for each one.

Remember to think about the following;

- Travel
- Construction
- Data storage
- Use of buildings
- Change of land use
- Opportunities for recycling and reuse

Environmental factor to consider	For the county council	For the county	Overall
Greenhouse gas emissions	No effect on emissions	No Effect on emissions	No effect on emissions
Waste	No effect on waste	No effect on waste	No effect on waste
Water use	No effect on water usage	No effect on water usage	No effect on water usage
Pollution (air, land, water, noise, light)	No effect on pollution	No effect on pollution	No effect on pollution
Resilience to adverse weather/climate events (flooding, drought etc)	No effect on resilience	No effect on resilience	No effect on resilience
Ecological effects (biodiversity, loss of habitat etc)	No effect on ecology	No effect on ecology	No effect on ecology
Heritage and landscape	No effect on heritage and landscape	No effect on heritage and landscape	No effect on heritage and landscape

If any of these factors are likely to result in a negative or positive environmental impact then a full climate change impact assessment will be required. It is important that we capture information about both positive and negative impacts to aid the council in calculating its carbon footprint and environmental impact.
