

GENERAL NOTES

Plant material to conform to BS3098 and handled in accordance with CPRE guidelines and planted in accordance with BS423.

Tree Burial

All trees to be planted in accordance with BS4238 and securely staked with groups of 3, 5 or 7 trees to be planted in accordance with the appropriate offsite guidance notes regarding statements.

Grass

Grass areas to be seeded in accordance with BS 4238 during March, April or September. Seed mix, as specified on the Plant Schedule, to be sown at the rate of 5g/m².

Areas of Planting and Turfing

These areas are to be planted with grass seed mix as specified in the Plant Schedule. These areas are to be planted in accordance with the appropriate offsite guidance notes regarding statements.

Plants of Offsets

Planted trees have been specified as bare root stock and should be planted during the normal planting season (Oct - Mar).

General

Planting shall be maintained, to include:

- weed control
- filter picking
- staking condition of tree stakes and ties

All stakes, ties and tree shingles shall be removed once the planting has become established and self-supporting. All staking to be removed from site.

Planting which fails to thrive or dies during the establishment period shall be replaced in the next planting season with plants of the same species and size.

LANDSCAPE MANAGEMENT PLAN

Establishment and Maintenance Period (Years 1-5)

Trees

Planted trees, removed or discarded tree branches shall be removed and disposed of from site. All tree stakes and ties shall be inspected during the growing season and adjusted as necessary to ensure that they are secure and firm and not causing the stems of the trees to girdle.

Excavation

Excavation shall be graded each year and maintained at a maximum height of 1.2m high.

Grass

In order to allow the gradient to develop into a semi-improved or unimproved grassland, the grass should be mown once or twice per year as required. Mowing Years 2-5, twice per season. All cuttings to be removed from site.

General

All areas of grassland shall be maintained, to include:

- weed control
- filter picking
- staking condition of tree stakes and ties

PLANT SCHEDULE

Species	Common Name	Form	x transplanted	Height (cm)	Root
Alnus	Alnus	Standard	2x	125-150	B
Acacia	Acacia	Standard	2x	125-150	B
Acacia saligna	Acacia saligna	Standard	2x	125-150	B
Betula pubescens	Betula pubescens	Standard	2x	125-150	B
Prunus spinosa	Prunus spinosa	Standard	2x	125-150	B
Salix caprea	Salix caprea	Standard	2x	125-150	B

GRASS SEED MIX

% by weight	Botanical name	Common Name
40	Festuca ovina	Sheeps fescue
20	Holcus lanatus	Meadow oat-grass
15	Trifolium repens	White clover
15	Stylosanthes	Quaking grass
10	Conium maculatum	Crested hair-grass
10	Cynodon dactylon	Stolonch grass
5	Cynodon dactylon	Crested Dogtail

KEY

- 1m contours
- Existing trees and vegetation (woodland and scrub planting)
- Existing young native woodland (planted in advance of Phase One Extraction Operations)
- Existing areas of grassland and vegetation (natural regeneration)
- Existing native hedges
- Existing area of scrub (planted in advance of Phase One Extraction Operations)
- Proposed trees
- Proposed grass
