Categories: Steph

Dear Steph,

I am writing in response to the representation from Mr Hird regarding the application from La Feria to change the conditions of its licence to permit trading on the terrace until 23.00 year round.

We fully respect all our neighbours rights and are acutely aware of the fact that we trade in a residential neighbourhood. We firmly adhere to the existing conditions of our Premises Licence, especially with regard to noise disturbance, and operate a strict curfew in respect of our permitted trading hours. We also have signage throughout the restaurant requesting customers to respect our neighbours when entering and leaving and staff are briefed to make customers aware of our neighbours in terms of noise levels.

On the new application, this is primarily intended so that we can seat diners in the enclosed area under the canopy directly in front of the restaurant, which is considered to be part of the terrace. We think it is extremely unlikely that weather conditions between October and March would enable customers to sit on the exposed terrace further down towards the road, especially between 21.00 - 23.00 at night.

As Mr Hird states, the fact that windows are more likely to be closed at this time of year further mitigates against noise disturbance from the canopy area.

However, as ever, we would be continue to be vigilant and respectful of potential noise issues, such as turning off any "piped" music into the canopy areas after 21.00.

I hope that this is satisfactory to Mr Hird but if not we are happy to answer any other concerns that he might have.

Yours sincerely,

Jez Verity
